Learn the fundamentals of PowerShell to build reusable scripts and functions to automate administrative tasks with Windows About This Book Harness the capabilities of the PowerShell system to get started quickly with server automation Learn to package commands into a reusable script and add control structures and parameters to make them flexible Get to grips with cmdlets that allow you to perform administration tasks efficiently Who This Book Is For This book is intended for Windows administrators or DevOps users who need to use PowerShell to automate tasks. Whether you know nothing about PowerShell or know just enough to get by, this guide will give you what you need to go to take your scripting to the next level. What You Will Learn Learn to verify your installed version of PowerShell, upgrade it, and start a PowerShell session using the ISE Discover PowerShell commands and cmdlets and understand PowerShell formatting Use the PowerShell help system to understand what particular cmdlets do Utilise the pipeline to perform typical data manipulation Package your code in scripts, functions, and modules Solve common problems using basic file input/output functions Find system information with WMI and CIM Automate IIS functionality and manage it using the WebAdministration module In Detail Windows PowerShell is a task-based command-line shell and scripting language designed specifically for system administration. Built on the .NET Framework, Windows PowerShell helps IT professionals and power users control and automate the administration of the Windows operating system and applications that run on Windows. PowerShell is great for batch importing or deleting large sets of user accounts and will let you collect a massive amount of detailed system information in bulk via WMI (Windows Management Instrumentation). Getting Started with PowerShell is designed to help you get up and running with PowerShell, taking you from the basics of installation, to writing scripts and web server automation. This book, as an introduction to the central topics of PowerShell, covers finding and understanding PowerShell commands and packaging code for reusability, right through to a practical example of automating IIS. It also includes topics such as installation and setup, creating scripts, automating tasks, and using Powershell to access data stores, registry, and file systems. You will explore the PowerShell environment and discover how to use cmdlets, functions, and scripts to automate Windows systems. Along the way, you will learn to perform data manipulation and solve common problems using basic file input/output functions. By the end of this book, you will be familiar with PowerShell and be able to utilize the lessons learned from the book to automate your servers. Style and approach A practical learning guide, complete with plenty of activities, examples and screenshots.

Jump Start Foundation FEMA

Learning PowerShell is a custom-built, handcrafted, painstakingly curated book designed to get you from total PowerShell newbie to confident PowerShell user in as little as four weeks. This book assumes no prior knowledge, perfect for non-developers and GUI addicts who recognize that PowerShell is the future but need a good bit of handholding to achieve mastery. It is also a simple guide for the hundreds of thousands of PowerShell users who have not attained the level of PowerShell knowledge that they really need. With Learning PowerShell at your side, you will see that you don't have to be a developer to use PowerShell and you don't need to be a scripting wizard to derive value from integrating PowerShell into your daily administrative activities. The book is a learning resource that covers every topic worth discussing for a PowerShell beginner, with a depth of explanation unparalleled by any book currently on the market. With this book, you don't have to have a lot of time to learn the language and you can begin applying what you master almost immediately. Even skeptics of PowerShell, and command lines in general, will come away with a renewed sense of respect for the language and ideas on how to put it to use.

[How to Create a Thriving Coaching Practice](#) Houghton Mifflin Harcourt

Real estate day trading is using the Internet to buy and sell houses without leaving home. In many cases, the investor closes on a house and resells it the same day. Readers will learn the author's system for how to buy and sell 5-10 houses a month in today's market, using the Internet, phone, fax, and email to analyze, research, and find the properties, buyers, and others needed for the transaction. Author Larry Goins has personally done deals in nine different states and has students in the US, Canada, Australia, New Zealand, Japan, China, Israel, the Philippines, and Denmark. Day trading can be used for wholesaling properties to other investors, retailing, lease options, short sales, foreclosure investing, etc. The basic steps are: Search online for potential properties to make offers on, using specific techniques for finding the right ones. Once an offer is accepted, usually within 1-2 weeks, put it on paper using clauses included in the book, and get the property inspected by a rehab contractor to get a free estimate of how much the repairs will cost. This is done by finding reputable contractors online and through referrals from realtors and through autoresponders. Order an appraisal. Sell it fast! Using the buyers list you have built on the internet through email marketing groups, social networking sites, blogs, free classified sites, bank-owned property sites, and more, send an email with the details of the property and instructions on how they can get the property under contract. Usually within two hours several potential buyers will reply. Set up a closing to buy it and to sell it on the same day; closings are about 30 minutes apart. By it at 10:00 and sell it at 10:30, for example. There are many ways to fund and close on the property. The book will contain step-by-step, easy processes for assignments, options, flex options, simultaneous closings, using hard money, private money, cash partners, and credit partners, none of which will require an investor's own cash or credit. With praise from New York Times Bestselling Author Dr. Albert Lowery, Robert Shemin, Frank McKinney and foreword by Michael E. Gerber. Larry Goins (Lake Wylie, SC; www.larrygoins.com) is one of the real estate industry's most popular speakers. He buys and sells 5-15 houses a month all over the US, in today's difficult market, from the comfort of his office. Larry speaks live an average of twice a week and holds two to three teleconferences a week. He is licensed as a mortgage lender, mortgage broker, real estate broker, and general contractor in North and South Carolina. Larry served as President (2003 & 2004) of the Metrolina Real Estate Investors Association in Charlotte, NC, a not-for-profit organization that has over 350 members (it is also the local chapter of the National Real Estate Investors Association). He has been investing in real estate for over 20 years.

REVIEW OF JUMP START GETTING STARTED WITH ASPEN PLUS V8

- Book Review Travels with Charley While reading Travels with Charley, all of my preconceived notions were shot and my mind frame changed. When I chose this book it was nothing like I assumed it to be. I never thought it would be so full of lessons and insights into life. This book rates a ten on my list. Very few books have moved me and I have to say that Travels with Charlie definitely has. He lets his readers know that the world does not

represent an evil place. There is still some good in life today. He gives insight into life in general as well as his own. His generalizations about how he feels inspired me to change the way that I live my life. I could quote a million phrases, but to really understand his words, one has to read the entire novel. I never expected a book about a man traveling around America to grab me with so much intensity. In my copy, I took a highlighter and marked every sentence that meant something to me. Travels with Charley not only added to my literary knowledge, but about the knowledge of feelings that I found within myself.END

- For ages 12-up, this book is an excellent journey. Steinbeck is a great writer, story teller, and I think I'm in love! If I could find a man with the sense

of adventure, humor, and passion for life that he has, I would be the happiest girl alive. I cherish the fact that he has such a passion for life. He says, "For I have always lived violently, drunk hugely, eaten too much or not at all,..." (17). I love that fact that he cares so much for his wife and devotes much of his time to his "...old Franch gentleman poodle known as Charley" (7). He also has a wise personality, and one can tell that he loves to investigate. In one part of the book he talks about how he is "over-interested in junk...Recently I stopped my car in front of the display yard of a junk dealer...it suddenly occurred to me that I had more than he had" (35). Anyway, if you want to read a book by an incredibly brilliant author who will take you on an across the country tour, meeting lots of people, read this! MReynolds
