Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art--particularly multimedia installations that take place in and on the surfaces of buildings--and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design.

These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, *Kissing Architecture* is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

Law, Rights and Ideology in Russia: Landmarks in the destiny of a great power brings into sharp focus several key episodes in Russia's vividly ideological engagement with law and rights. Drawing on 30 years of experience of consultancy and teaching in many regions of Russia and on library research in Russian-language texts, Bill Bowring provides unique insights into people, events and ideas. The book starts with the surprising role of the Scottish Enlightenment in the origins of law as an academic discipline in Russia in the eighteenth century. The Great Reforms of Tsar Aleksandr II, abolishing serfdom in 1861 and introducing jury trial in 1864, are then examined and debated as genuine reforms or the response to a revolutionary situation. A new interpretation of the life and work of the Soviet legal theorist Yevgeniy Pashukanis leads to an analysis of the conflicted attitude of the USSR to international law and human rights, especially the right of peoples to self-determination. The complex history of autonomy in Tsarist and Soviet Russia is considered, alongside the collapse of the USSR in 1991. An examination of Russia's plunge into the European human rights system under Yeltsin is followed by the history of the death penalty in Russia. Finally, the secrets of the ideology of 'sovereignty' in the Putin era and their impact on law and rights are revealed. Throughout, the constant theme is the centuries long hegemonic struggle between Westernisers and Slavophiles, against the backdrop of the Messianism that proclaimed Russia to be the Third Rome, was revived in the mission of Soviet Russia to change the world and which has echoes in contemporary Eurasianism and the ideology of sovereignty.

Britain's public (that is, its major independent) schools have a conspicuous role in the country's social system, and as a result are the subject of a long-standing political debate. The discussion is generally founded on a stereotyped image of what these schools may have been like in the 1950s – this book shows how they were in the late 1980s. It is based on fieldwork in two major public boarding schools which the author conducted over an extended period, and draws on interviews, observation and documentary sources to establish a picture of what public school life is actually like for pupils and staff. Since the schools were predominantly male preserves, the major part of the book describes the social world and experiences of boys and school-masters. An important section of the book, however, discusses the introduction of girl pupils, the experiences of female teachers and the way schoolmasters' wives tend to be drawn into their husbands' work. Geoffrey Walford's conclusions about life in public schools differ considerably from traditional expectations. At the same time he asks whether there really has been a 'public school revolution'. His book makes an important contribution to our knowledge of public schools, to debates in the sociology of education and to the issues of abolishing or extending the independent sector.

REVIEW OF BASEBALL SCOUTING REPORT SHEETS SLIBFORME COM

- An environmental book written by a statistician! 90% of all statistics can be used to show either side of the argument 50% of the time! This author uses this skill liberally. The first chapter makes a very valid point: be aware of what you're reading and be skeptical! The rest of the book is slanted toward his OPINION and he disregards information that doesn't support his viewpoints. Many things may not be as bad as some portray but they aren't as rosy as this author portrays either. READ WITH SKEPTICISM!!

- It is true that Lomborg's book does contain some errors. And that is why I am giving it only 4 Stars. But Lomborg has freely admitted them; More importantly, however, these minor mistakes do not undermine his main conclusion that the Earth's Environment is improving, rather than declining. We have had predictions of mass famine in the 1960's too due to the growing world population but the subsequent Green Revolution boosted crop production and supported the increased population. My point here is that Scientists and Prognosticators cannot predict the future. Personally, I do think that we should do more to curb Global Greenhouse Gas Emissions and increase Fuel Economy Standards in both Canada and the US. Having a higher gas or electric bill tends to focus one's mind on buying energy saving devices, light bulbs, etc. Having said that, we should equally NOT Demonise individuals such as Bjorn Lomborg who argue that the Earth's Environment is gradually improving rather than going to hell in a hand basket. Rather we should rationally examine the scientific facts first and then form a conclusion as Lomborg attempts to do in his book. Some critics of Dr. Lomborg have referred to the January 2003 report by the Danish Committee on Scientific Dishonesty (DCSD) as essentially discrediting the entire basis of The Skeptical Environmentalist. But, in fact, many lay people have pointed out serious flaws in the Methodology of DCSD's conclusions and on its refusal to give Lomborg prior to the release of their critical report. The Danish Ministry of Science, Technology and Innovation has now (December 2003) intervened to harshly criticised the DCSD's methodology and to repudiated their findings on Lomborg's book. Among the points cited is that firstly, the DCSD failed to substantiate its case against Lomborg's book and did not state where exactly Lomborg committed his alleged mistakes. In such a situation, Lomborg could not be expected to respond to the DCSD's critiques--which some have said merely copy Scientific American's previous criticisms of Lomborg's work. Secondly, while DCSD emphasised that all scientific work should go through a peer review, they omitted to examine whether such a procedure had been done in Lomborg's case. In fact, Lomborg's book had, in fact, been reviewed by 4 recognised scientists prior to its publication by the Cambridge University Press. Thirdly, the Danish Ministry of Science, Technology and Innovation criticised the language and tone of DCSD's report as being highly emotional and error prone--in other words, somewhat unprofessional for a scholarly Committee. Fourthly, DCSD's procedure of presenting Lomborg's case before 3 separate scientific Committees instead of the usual one was quite irregular and procedurally incorrect. Moreover with this new situation, a ruling which was issued by the Individual Committee within whose area of study Lomborg worked could be overturned by the 2 other Committees. Fifthly, it was "clearly wrong" to deny Dr. Lomborg an opportunity to first defend his book before the Danish Committee of Scientific Dishonesty prior to the Committee's release of its judgement. Finally, the Chairman of the Sub-committee in the Lomborg case came from the Health Sciences, rather than from the Social Sciences Department, which is Dr. Lomborg's field. I thought it was quite funny that this was the case--it wld be like asking a Biologist to study the work of a Chemist and makes no sense at all! In summary, the January 2003 DCSD ruling seems to have been intended as a hatchet job on Lomborg's work. Perhaps it was an attempt to discredit the views of those who don't subscribe to the Environmentalist viewpoint. But fortunately, there is some justice to this world and the DCSD report has now been publicly repudiated by the DCSD's own superiors. As Lomborg states after the release of the Danish Ministry of Science, Technology & Innovation's report: "It has been hard, but I am happy that we now have confirmation that freedom of speech extends to Environmental debate. Now that this distraction is behind us, we can concentrate our efforts on matters of importance--namely how to prioritize our effort for the earth." I think he couldn't have said it better. One should let the scientific facts on the ground--rather than the angry rhetoric and threats emanating from Environmental groups and their supporters against both Lomborg or his publisher, Cambridge University Press--to control the debate over how to preserve the Earth's Environment for the benefit of our future generations. These actions strike me as an attempt to suppress dissent on such an important topic. Thank You.
