Sindhi nationalism is one of the oldest yet least studied cases of identity politics in Pakistan. Ethnic discontent appeared in Sindh in opposition to the rule of the Bombay presidency; to the onslaught of Punjabi settlers in the wake of canal irrigation; and, most decisively, to the arrival of millions of Muhajirs (Urdu-speaking migrants) after Partition. Under Zulfikar Ali Bhutto, Benazir Bhutto and Asif Zardari, the Pakistan People's Party has upheld the Sindhi nationalist cause, even while playing the game of federalist politics. On the other side for half a century have been hardcore Sindhi nationalist groups, led by Marxists, provincial autonomists, landlord pirs and liberal intelligentsia in pursuit of ethnic outbidding. This book narrates the story of the Bhutto dynasty, the Muhajir factor, nationalist ideologues, factional feuds amongst landed elites, and the role of violence as a maker and shaper of Sindhi nationalism. Moreover, it examines the role of the PPP as an ethnic entrepreneur through an analysis of its politics within the electoral arena and beyond. Bringing together extensive fieldwork and comparative studies of ethno-nationalism, both within and outside Pakistan, Asma Faiz uncovers the fascinating world of Sindhi nationalism.

Women in Early America, edited by Thomas A. Foster, tells the fascinating stories of the myriad women who shaped the early modern North American world from the colonial era through the first years of the Republic. This volume goes beyond the familiar stories of Pocahontas or Abigail Adams, recovering the lives and experiences of lesser-known women—both ordinary and elite, enslaved and free, Indigenous and immigrant—who lived and worked in not only British mainland America, but also New Spain, New France, New Netherlands, and the West Indies. In these essays we learn about the conditions that women faced during the Salem witchcraft panic and the Spanish Inquisition in New Mexico; as indentured servants in early Virginia and Maryland; caught up between warring British and Native Americans; as traders in New Netherlands and Detroit; as slave owners in Jamaica; as Loyalist women during the American Revolution; enslaved in the President's house; and as students and educators inspired by the air of equality in the young nation. Foster showcases the latest research of junior and senior historians, drawing from recent scholarship informed by women's and gender history—feminist theory, gender theory, new cultural history, social history, and literary criticism. Collectively, these essays address the need for scholarship on women's lives and experiences. Women in Early America heeds the call of feminist scholars to not merely reproduce male-centered narratives, "add women, and stir," but to rethink master narratives themselves so that we may better understand how women and men created and developed our historical past.

Now available in a fully revised and updated second edition, this practical manual is a detailed guide to the Palin Parent-Child Interaction Therapy programme (Palin PCI) developed at the Michael Palin Centre for Stammering (MPC). Palin PCI builds on the principle that parents play a critical role in effective therapy and that understanding and managing stammering is a collaborative journey between the child, parent and therapist. This book emphasises a need for open communication about stammering, offering a combination of indirect techniques such as video feedback, interaction strategies and confidence building, along with direct techniques to teach a child what they can do to help themselves. This second edition: Reflects the most up-to-date research in areas such as neurology, genetics, temperament and the impact of stammering on children and their families Offers photocopyable resources, such as assessment tools, information sheets and therapy handouts, to support the implementation of Palin PCI Focuses on empowerment through building communication confidence in children who stammer and developing knowledge and confidence in their parents Based on a strong theoretical framework, this book offers a comprehensive understanding of the Palin PCI approach in order to support generalist and specialist speech and language therapists as they develop their knowledge, skills and confidence in working with young children who stammer and their families. Book Excerpt: ...relative social positions of man and wife, but the religious reflection of these conditions in the minds of men. Hence Bachofen represents the Oresteia of Aeschylus as the dramatic description of the fight between the vanishing maternal and the paternal law, rising and victorious during the time of the heroes. Clytemnestra has killed her husband Agamemnon on his return from the Trojan war for the sake of her lover Aegisthus; but Orestes, her son by Agamemnon, avenges the death of his father by killing his mother. Therefore he is persecuted by the Erinyes, the demonic protectors of maternal law, according to which the murder of a mother is the most horrible, inexpiable crime. But Apollo, who has instigated Orestes to this act by his oracle, and Athene, who is invoked as arbitrator--the two deities representing the new paternal order of things--protect him. Athene gives a hearing to both parties. The whole question is summarized in the ensuing debate between Orestes and the Erinyes. Orestes claims that..

Educational practice does not, for the most part, rely on research findings. Instead, there's a preference for relying on our intuitions

about what's best for learning. But relying on intuition may be a bad idea for teachers and learners alike. This accessible guide helps teachers to integrate effective, research-backed strategies for learning into their classroom practice. The book explores exactly what constitutes good evidence for effective learning and teaching strategies, how to make evidence-based judgments instead of relying on intuition, and how to apply findings from cognitive psychology directly to the classroom. Including real-life examples and case studies, FAQs, and a wealth of engaging illustrations to explain complex concepts and emphasize key points, the book is divided into four parts: Evidence-based education and the science of learning Basics of human cognitive processes Strategies for effective learning Tips for students, teachers, and parents. Written by "The Learning Scientists" and fully illustrated by Oliver Caviglioli, *Understanding How We Learn* is a rejuvenating and fresh examination of cognitive psychology's application to education. This is an essential read for all teachers and educational practitioners, designed to convey the concepts of research to the reality of a teacher's classroom.

This book tackles the issue of delimiting Sufism: where does it start and where does it end? Speaking about Sufism does not typically account for its broad range of influence on societies and cultures, thus this Dictionary aims to highlight the extent of Sufism's reach, specifically in the context of Sindh. Various forms and iterations of Sufism are practically ubiquitous across Sindh, including even its most remote regions. The many discourses expressed by Sufism are often interwoven with other devotional traditions in the region, merged by the use of a shared technical lexicon in the fields of both poetry and ritual. The Dictionary consequently includes references to the traditions and literatures with which Sufism has engaged, like those of the Muslim *Isma'ilis* and *ikris*, and the Hindu *Daryapanthis* and *Nanakshahis*. The reference language of the Dictionary is Sindhi as, besides some dialectical variations, the language remains a common thread between the Sufi cultures of Sindh, the neighbouring regions of India, and the Sindhi diaspora. The Dictionary is alphabetically-arranged, and features vivid illustrations, an extensive bibliography, and a chronological chart of major historical events pertaining to the topic.

Over the last fifteen years, Pakistan has come to be defined exclusively in terms of its struggle with terror. But are ordinary Pakistanis extremists? And what explains how Pakistanis think? Much of the current work on extremism in Pakistan tends to study extremist trends in the country from a detached position—a top-down security perspective, that renders a one-dimensional picture of what is at its heart a complex, richly textured country of 200 million people. In this book, using rigorous analysis of survey data, in-depth interviews in schools and universities in Pakistan, historical narrative reporting, and her own intuitive

understanding of the country, Madiha Afzal gives the full picture of Pakistan's relationship with extremism. The author lays out Pakistanis' own views on terrorist groups, on jihad, on religious minorities and non-Muslims, on America, and on their place in the world. The views are not radical at first glance, but are riddled with conspiracy theories. Afzal explains how the two pillars that define the Pakistani state—Islam and a paranoia about India—have led to a regressive form of Islamization in Pakistan's narratives, laws, and curricula. These, in turn, have shaped its citizens' attitudes. Afzal traces this outlook to Pakistan's unique and tortured birth. She examines the rhetoric and the strategic actions of three actors in Pakistani politics—the military, the civilian governments, and the Islamist parties—and their relationships with militant groups. She shows how regressive Pakistani laws instituted in the 1980s worsened citizen attitudes and led to vigilante and mob violence. The author also explains that the educational regime has become a vital element in shaping citizens' thinking. How many years one attends school, whether the school is public, private, or a madrassa, and what curricula is followed all affect Pakistanis' attitudes about terrorism and the rest of the world. In the end, Afzal suggests how this beleaguered nation—one with seemingly insurmountable problems in governance and education—can change course.

- The supporting personalities in Course Sindhi Archive publication additionally play an important function in the story, with every one adding deepness and intricacy to the story.
- From the lead character's faithful best friend to the mysterious stranger the antagonist befriends, the supporting cast assists to bring the world of the tale to life.

In general, the personality advancement in this publication is one of its toughness. Each character is well-crafted and contributes to the general tale, producing an absolutely enjoyable read.

This multi-sited ethnography considers the impact of contested definitions on the experiences and representations of Sindhi Hindus. Ramey recognizes how the dominant definitions of Hinduism, Islam, and Sikhism challenge communities who defy such understandings and analyzes the ways Sindhi Hindus have established their unconventional practices and heritage in the context of their diaspora. By analyzing concrete examples of the creation of a heritage in the context of migration, this book

considers the implications of representations of religions for Sindhi Hindus and other similar communities.

*Islands and Snakes* contains 13 chapters describing ecological systems with foci on snakes and their ecological roles on islands around the world. Each chapter is written by one or more authors who is an authority on that particular system. Summaries of research on the various islands are written in a narrative manner that includes science as well as personal insights in easily understood language. These varied vignettes of science feature islands around the world, and in all cases, fantastic species of snakes and their roles in the community of insular organisms in which they occur. Both challenges and opportunities associated with island life are discussed, as well as the unique attributes of snakes and their conservation as unique and important parts of nature. Chapters include colorful photographs and illustrations, and collectively they convey information on topics that include ecology, behavior, biogeography, physiology, adaptation, and evolutionary biology. An introductory chapter presents a review and perspective on the historical importance of island ecology and how snakes have contributed to our understanding of

evolution and adaptation. The other chapters focus on snakes inhabiting islands associated with Asia, Australia, South America, North America, the Caribbean, and Europe. The final chapter features the unique "table top islands" or tepuis of South America as examples of ecological islands where elements of biota have become isolated by geographic features of landscape similarly to oceanic islands.

*The Man Who Planted Trees* is the inspiring story of David Milarch's quest to clone the biggest trees on the planet in order to save our forests and ecosystem—as well as a hopeful lesson about how each of us has the ability to make a difference. "When is the best time to plant a tree? Twenty years ago. The second best time? Today."—Chinese proverb Twenty years ago, David Milarch, a northern Michigan nurseryman with a penchant for hard living, had a vision: angels came to tell him that the earth was in trouble. Its trees were dying, and without them, human life was in jeopardy. The solution, they told him, was to clone the champion trees of the world—the largest, the hardiest, the ones that had survived millennia and were most resilient to climate change—and create a kind of Noah's ark of tree genetics. Without knowing if the message had any basis in science, or why he'd been chosen for this task, Milarch began his mission of cloning the world's great trees. Many scientists and tree experts told him it couldn't be done, but, twenty years later, his team has successfully cloned some of the world's oldest trees—among them giant redwoods and sequoias. They have also grown seedlings from the oldest tree in the world, the bristlecone pine Methuselah. When New York Times journalist Jim Robbins came upon Milarch's story, he was fascinated but had his doubts. Yet over several years, listening to Milarch and talking to scientists, he came to realize that there is so much we do not yet know about trees: how they die, how they communicate, the myriad crucial ways they filter water and air and otherwise support life on Earth. It became clear that as the planet changes, trees and forest are essential to assuring its survival. Praise for *The Man Who Planted Trees* "This is a story of miracles and obsession and love and survival. Told with Jim Robbins's signature clarity and eye for telling detail, *The Man Who Planted Trees* is also the most hopeful book I've read in years. I kept thinking of the end of Saint Francis's wonderful prayer, 'And may God bless you with enough foolishness to believe that you can make a difference in the world, so that you can do what others claim cannot be done.'"—Alexandra Fuller, author of *Don't Let's Go to the Dogs Tonight* "Absorbing, eloquent, and loving . . . While Robbins's tone is urgent, it doesn't compromise his crystal-clear science. . . . Even the smallest details here are fascinating."—Dominique Browning, *The New York Times* Book Review "The great poet W. S. Merwin once wrote, 'On the last day of the world I would want to plant a tree.' It's good to see, in this lovely volume, that some folks are getting a head start!"—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet* "Inspiring . . . Robbins lucidly summarizes the importance and value of trees to planet Earth and all humanity."—*The Ecologist* " 'Imagine a world without trees,' writes journalist Jim Robbins. It's nearly impossible after

reading *The Man Who Planted Trees*, in which Robbins weaves science and spirituality as he explores the bounty these plants offer the planet."—Audubon

### REVIEW OF COURSE SINDHI ARCHIVE

- Three cheers for Macromedia's "innovative" logic of offering DreamWeaver users the online Help Menu built RIGHT into DW. It makes me wonder: Who DIDN'T notify the author of this

otherwise good book that Macromedia would do such a thing?! I'm not knocking the author -- his book deserves 2 1/2 stars (since he did not even touch some critical features of DreamWeaver); but why buy it when the online documentation is so terribly superior?

- This short, brilliant novel attempts to answer the question "Do we live by accident and die by accident, or live by plan and die by plan." A well-traveled, primitive bridge in Peru collapses one day in the early 1700s, sending five people to their deaths. Brother Juniper, a Spanish friar, is sent to investigate; he reveals to us the life stories of the five victims. The five people represent a mixture of the proud, the contrite, the sick at heart. Brother Juniper is convinced their deaths are a just act of God, for which he is condemned by the Church and burned at the stake. Countering Brother Juniper's view is Wilder, who believes that the answer to the question is not decidedly accident or plan, but an ambiguous combination of the two. Above all, he claims, is the love that was involved in each person's life: this love "will have been enough; all those impulses of love return to the love that made them. There is a land of living and a land of dead and the bridge is love." Wilder develops his theme and characters superbly; the characters whose lives are lost at the bridge are beautifully fleshed out. In fact, "beautiful" might be the best word to use to describe the book - it's almost poetic, especially in its concerns with love. Wilder won a Pulitzer for this, his second novel. It's a memorable work by a master craftsman and wordsmith.
