Special Educational Needs Nelson Thornes

This edited book first consolidates the

results of the EU-funded EDISON project (Education for Data Intensive Science to Open New science frontiers), which developed training material and information to assist educators, trainers, employers, and research infrastructure managers in identifying, recruiting and inspiring the data science professionals of the future. It then deepens the presentation of the information and knowledge gained to allow for easier assimilation by the reader. The contributed chapters are presented in sequence, each chapter picking up from the end point of the previous one. After the initial book and project overview, the chapters present the relevant data science competencies and body of knowledge, the model curriculum required to teach the required

foundations, profiles of professionals in this domain, and use cases and applications. The text is supported with appendices on related process models. The book can be used to develop new courses in data science, evaluate existing modules and courses, draft job descriptions, and plan and design efficient data-intensive research teams across scientific disciplines.

It should also enable human resource managers to verify the qualifications of potential employees.

Developments in vocational education and training. II Nelson Thornes

This report provides information on the administration and structure of all levels of education and initial vocational training in 17 countries--the 15 Member States of the European Union and Iceland and Norway. Country reports are arranged in a similar way to facilitate comparison. Chapter 1 contains information on each country, the basic

principles affecting the education and training systems, the distribution of responsibilities, administration, inspection, financing, private education, and advisory bodies. The following chapters cover preschool, primary, secondary (general, technical, and vocational) education, initial vocational training for young people, and higher education. Sections dealing with curriculum, assessment, teachers, and statistics follow a general description of the objectives and organization of each level. Statistical data cover the number of pupils/students, teachers, institutions and, where available, pupil-teacher ratios, attendance or completion rates, and the options taken up at different stages. Initial vocational training covers programs that are usually outside the

formal education system, such as apprenticeship, youth training, and vocational integration programs. After a general outline, the higher education section includes the following: admission, fees/student finance, academic year, courses, qualifications, and assessment. Diagrams of the systems, with brief explanatory notes are found at the beginning of each chapter. (YLB)

Modularisation of Vocational Education in Europe Routledge

This volume focuses on the recent changes in education and training policy, mainly in the UK. The considerable developments of past years and the ways in which they have affected both education and training are examined. The contributors analyse the methods by which we educate our workforce, and

look closely at the kind of training now offered to those in work. The chapters in this reader cover: * the role of the state * how economic factors influence education * national education and training policy * the political factor. Other countries including Germany are looked at, and there is reflection on the ways in which the 'new' industry led qualifications such as NVQs have fared. There is careful analysis as to how much the political climate of the time influenced developments. There is thorough research to back up claims made throughout the book, and many practical examples are referred to. What emerges is an incisive examination of current trends in education and the workplace.

REVIEW OF LEVEL 2 CORE

MANDATORY UNITS STL1 PROVIDE SUPPORT FOR

- Love makes the world go round and keeps Lincoln Child's latest techno-thriller tightly wound. Child, with or without his writing partner, Douglas Preston, keeps me up at night. I'm a little bit scared, a little bit thrilled and I find it tough to put the book down and catch some ZZZZs. This is his best solo effort to this point. Death Match has a very strong start with a puzzling, compelling problem for the book's hero. I don't want to spoil the plot for any readers, but the opening chapters hit hard emotionally. Child has always excelled at balancing technical explanation with jazzing it up so it's fun to read. He seems to choose his technology for thrillers by

picking something he himself is interested in but he's very good at explaining current art plus fun but logical extensions without lapsing into major geekdom. This book has excellent pacing - I required two coffees the next morning even though I seldom touch caffeine. I just couldn't stop reading. I wasn't scared. Instead I found myself trying to take Child's clues and play "Clue." Who was the villain? Why were these inexplicable things happening? Was there any connection to the psychologist's past experiences? Almost everyone I know has had a fling at computer dating and been disappointed. Child dangles a very realistic though flashy scenario of making a "perfect match" in front of the reader. There is a sense that the villain is playing a game

with Christopher Lash, the forensic psychologist. Is this a match that started in his past? Or did it start in Eden (the corporation that matches prospective life mates)? Definitely a thrill ride and perfect beach reading, too.

- When you need a lift in faith, read this book. Even if you like historical literature

or just want a satisfying read, you will enjoy Song of Abraham. Ellen G. Traylor puts into perspective the incredible belief Abraham must have had to follow God - at all costs. (A good idea is to find the bible account and read it before you read Song of Abraham. I did that, and found that it followed pretty closely.)
