### REVIEW OF INTRODUCTION TO NETWORK SECURITY THEORY AND PRACTICE

- In my opinion Head First EJB is a great study guide for the Sun Certified Business Component Developer exam. It's format is designed to make you understand and remember things in an easy and fun way and it definately worked for me! I studied for the exam mainly using this book, and passed with a score of 97%.The book explains all aspects you need to know clearly and contains many useful excercises and mock tests. Although it covers not every tiny detail of the specs and the exam, I'm sure you will pass the exam if you know this book in and out.I already had some experience wit EJB and the book made me understand a lot of what's going on behind the scene! So i'ts not only a good book for SCBCD, but also a very good and thorough introduction/course to the EJB-theory !Head First rocks!

- This is the book that all people interested in advertising have been waiting for and will enjoy. It was talked about on KGO newstalk 810 a.m. and was created by the maker of the Pet Rock. For advertising students this will be of great help for your classes and for those of you already working in the field of advertising this will be a great read providing a deeper insight into this amazing field.
