"Rollrock Island is a lonely rock of gulls and waves, blunt fishermen and their homely wives. Life is hard for the families who must wring a poor living from the stormy seas. But Rollrock is also a place of magic -- the scary, salty-real sort of magic that changes lives forever. Down on the windswept beach, where the seals lie in herds, the outcast sea witch Misskaella casts her spells and brings forth girls from the sea -- girls with long, pale limbs and faces of haunting innocence and loveliness, the most enchantingly lovely girls the fishermen of Rollrock have ever seen. But magic always has its price. A fisherman may have and hold a sea bride and tell himself that he is her master, but from his first look into those wide, questioning, liquid eyes, he will be just as transformed as she is. He will be equally ensnared. And in the end the witch will always have her payment"--Dust jacket. Suggested level: secondary.

REVIEW OF FROZEN FIRE TIM BOWLER

- This is a very well written and easy to read overview of COM+ and how it compares to EJB and CORBA. The author was in the OMG group as one of the developers of CORBA. He got an invitation to write on how CORBA compares to Microsoft's version of the same thing, COM+. He accepted and realized that Microsoft has elegantly solved some of the problems that vexed CORBA. He describes Microsoft's solutions and then compares them to EJB and points out how EJB has copied alot of COM+ has done.

- I normally do not write reviews but when I noted a person said this book was for a 'housewife' and gave it one star I thought something was amiss. I found this book to be very practical, with numerous examples that show 'how to do it.' I purchased other books on this topic and found them to be filled with standards literature from the ITU. Thus, I was perplexed how someone could rate this book with one star when its significantly better than the others that spend most pages repeating ITU specifications.
