Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser

still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

This book contains contributions by some of the leading researchers in the area of grey systems theory and applications. All the papers included in this volume are selected from the contributions physically presented at the 2009 IEEE International Conference on Grey Systems and Intelligent Services, November 11 - 12, 2009, Nanjing, Jiangsu, People's Republic of China. This event was jointly sponsored by IEEE Systems, Man, and Cybernetics Society, Natural Science Foundation of China, and Grey Systems Society of China. Additionally, Nanjing University of Aeronautics and Astronautics also invested heavily in this event with its

direct and indirect financial and administrative supports. The conference aimed at bringing together all scholars and experts in the fields of grey systems and intelligent services from around the world to share their cutting edge research results, exchange innovative ideas, promote mutual understanding, and seek potential opportunities for collaboration. The conference program committee received 1054 full paper submissions from 16 countries and geographical regions. Nine hundred sixty four papers were submitted for regular sessions and 90 papers were tunnelled directly for special topic sessions. All the submitted papers, including those aiming at special topic sessions, were rigorously reviewed by at least 3 reviewers. Based on the reviewers'

reports, 251 papers were accepted for oral presentations, while 99 accepted for poster presentations. In other words, only slightly over 33% of the submitted papers were accepted by this conference. The rate of acceptance was lower than one third of the total submissions.

Like *The Group*, Mary McCarthy's classic tale about coming of age in New York, Joanna Smith Rakoff's richly drawn and immensely satisfying first novel details the lives of a group of Oberlin graduates whose ambitions and friendships threaten to unravel as they chase their dreams, shed their youth, and build their lives in Brooklyn during the late 1990s and the turn of the twenty-first century.

There's Lil, a would-be scholar whose marriage to an egotistical writer initially brings the group back together (and ultimately drives it apart); Beth, who struggles to let go of her old beau Dave, a onetime piano prodigy trapped by his own insecurity; Emily, an actor perpetually on the verge of success -- and starvation -- who grapples with her jealousy of Tal, whose acting career has taken off. At the center of their orbit is wry, charismatic Sadie Peregrine, who coolly observes her friends' mistakes but can't quite manage to avoid making her own. As they begin their careers, marry, and have children, they must navigate the shifting dynamics of their friendships and of the world around them. Set against the backdrop of the vast economic and political changes of the

era -- from the decadent age of dot-com millionaires to the sobering post-September 2001 landscape -- Smith Rakoff's deeply affecting characters and incisive social commentary are reminiscent of the great Victorian novels. This brilliant and ambitious debut captures a generation and heralds the arrival of a bold and important new writer.

REVIEW OF 3VZE ENGINE TORQUE SPECS

- I first got hooked on autobiographies, when I read a book by Richard Wurmbrand. Then a friend told me about this book and I got it immediately, and read it in about 2 days. I'm not a reader, like seriously, I don't enjoy reading at all. But I couldn't put this book down. Noble

Alexander was an incredible man of God and I am humbled and challenged when I read his story. This book will change your life!

- In Counseling with Choice Thoery, William Glasser demonstrates how to communicate with people who are going through difficulty in ways that help them see the power of choice in their lives. Time and time again, Glasser shows people that when they honor the fact that they can only control their own actions, they become liberated from external control. When we stop trying to control others, we can better harness our energies to work with what we can influence: our own thoughts and behaviors. This book is written in an anecdotal style that makes for easy reading. It is geared somewhat to the

clinician who works with people undergoing great difficulties. However, anyone who finds Choice Theory a useful paradigm would gain greater understanding through reading this book. By demonstrating how the same perspective can be brought to bear on a wide variety of human suffering, Glasser shows the effectiveness of his theory in a very practical way. I feel far more confident in working in this paradigm after reading this book.
