Biological sciences have been revolutionized, not only in the way research is conducted -- with the introduction of techniques such as recombinant DNA and digital technology -- but also in how research findings are communicated among professionals and to the public. Yet, the undergraduate programs that train biology researchers

remain much the same as they were before these fundamental changes came on the scene. This new volume provides a blueprint for bringing undergraduate biology education up to the speed of today's research fast track. It includes recommendations for teaching the next generation of life science investigators, through: Building a strong interdisciplinary curriculum that includes physical science, information technology, and mathematics. Eliminating the administrative and financial barriers to cross-departmental collaboration. Evaluating the impact of medical college admissions testing on undergraduate biology education. Creating early opportunities for independent research. Designing meaningful laboratory experiences into

the curriculum. The committee presents a dozen brief case studies of exemplary programs at leading institutions and lists many resources for biology educators. This volume will be important to biology faculty, administrators, practitioners, professional societies, research and education funders, and the biotechnology industry.

In Volume III, as in Volumes I and II, the classic topics of reading are included--from vocabulary and comprehension to reading instruction in the classroom--and, in addition, each contributor was asked to include a brief history that chronicles the legacies within each of the volume's many topics. However, on the whole, Volume III is not about tradition. Rather, it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date. The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published: (1) broadening the definition of reading, and (2) broadening the reading research program. The particulars of these new themes and

topics are addressed.

REVIEW OF BIOLOGY SECOND SEMESTER STUDY GUIDE ANSWERS

- As a gentle comedy of pre World War I manners and sensibilities, set in Florence and England, E. M. Forster's "A Room With a View" is a 20th century masterpiece. The novel shares some of the conventions of works by Forster's

contemporaries Galsworthy and Hardy, but with a lighter touch. I suspect that this is one of a small handful of British novels of the last century which will continue to be read and enjoyed a hundred years from now..

- In *A Room with a View*, E.M. Forster infuses a formulaic plot with rich characters and social commentary to create an eloquent insight into the human condition. Forster's gift for detailed character description and subtle sarcasm are prominently displayed as he describes protagonist Lucy Honeychurch's transformation from virtuous, obedient girl to vivacious, independent woman. *A Room with a View* was first published in 1908, at a time when the British Empire was at its apex. The stereotypical images of high British

society - proper tea parties, cultured conversation, and mild-mannered ladies-were still commonplace. However, a cultural revolution was taking shape. Women were beginning to challenge their role as symbols of modesty and decorum, while socialists and other freethinkers criticized the insular, intolerant views of the upper class. In the midst of this rising movement of innovation, young Lucy Honeychurch takes a sightseeing tour of Italy. Raised in sheltered comfort at her estate in Surrey, England, Lucy is dutiful, submissive, and subconsciously able to suppress her own feelings in order to please others. In Florence, Lucy meets George Emerson, a passionate, spontaneous man with radical ideas on life. After a brief romantic encounter,

Lucy returns to England, feeling confused and strangely dejected. Her sense of propriety outweighs her emotions, however, and soon she is engaged to a well connected, self-important man named Cecil. Cecil exemplifies the haughtiness and superficiality of the upper class. Forster describes him as, "Well educated, well endowed, and not deficient physically, he remained in the grip of a certain devil whom the modern world knows as self-consciousness" (100). As Lucy and her snooty fiancée prepare for their wedding, George moves into a nearby villa. His reappearance sparks both feelings of love and contempt in Lucy, who vows to ignore him and devote herself to Cecil. But confrontation is unavoidable, and in their few moments

alone, George inspires Lucy to break off the engagement with Cecil. He tells her, "Every moment of his [Cecil's] life he's forming you, telling you what's charming or amusing or ladylike, telling you what a man thinks womanly; and you, you of all women, listen to his voice instead of your own" (191). Lucy realizes the truth in his statement, but is so distraught, that she rejects both Cecil and George. It takes a heartfelt speech by George's father and a great deal of soul searching before Lucy realizes that she needs George. After all, he is the catalyst that starts Lucy down her path of self-discovery. While the plot of *A Room with a View* is similar to other period romance novels, such as those by Jane Austen and the Brontë's, Forster's didactic style and witty sarcasm lift the book above

the standard. Forster includes comments like, "But, as I say, this took a little thinking, and - so illogical are girls - the event remained rather greater and rather more dreadful than it should have done" (137). This quote highlights Forster's love of humor and cynicism, but it also brings up another issue that sets him apart from his peers. Forster is a man writing about a topic that is typically covered by women. While his views may be biased at times, his perspective adds a unique element to the genre. Even more amazing, is Forster's ability to portray a young woman's personal and emotional rebirth with such understanding and clarity. Lucy is a complex character who continually struggles with outside influences and her own beliefs. All of her

emotional battles are internal, but Forster records them so beautifully that they are just as exciting to read as any external action. For example, he writes, "Some emotion - pity, terror, love, but the emotion was strong - seized her, and she was aware of autumn. Summer was ending, and the evening brought her odours of decay, the more pathetic because they were reminiscent of spring...The scales fell from Lucy's eyes" (193-94). Although Forster is a man, he captures the spirit of a woman in his words. E.M. Forster's story expressively highlights human nature, personal growth, and free will through the development of Lucy Honeychurch. Forster has the remarkable ability to be sarcastic one moment and poetic the next. Ultimately, it is his unique style

and character development that make *A Room with a View* an incomparable novel.
