### **REVIEW OF ZENO S CONSCIENCE**

- To say that this book is remarkably relevant for a publication dating back to 1954 is little better than pointing out that getting out of bed is a prerequisite to a good day's work, or that the 1920 - 1930 architecture of Mies van der Rohe is still the cornerstone of today's architecture. That said, there are many good things to consider with regard to managing a PRIVATE business. Much is made of management's responsibilities toward society. But this seems to me to be proposed from the context of fear and/or reprisal if management doesn't accept such a responsibility. Furthermore, as the example of 'the mystery of the washroom doors' made clear, the managed are content to axe down a washroom door in preference to spending twenty cents of their own money to purchase a new key to replace a lost key, and let the thousands of dollars worth of repair bills fall to management whose fault it was for making a claim for new keys too difficult. 'That'll learn em!' The biggest impediment to management as advocated in this book, is government. Government in consort with a myriad of non-elected bodies now compels a business, through draconian legislation, to conform to a specified role in society. In Drucker's day, this was more a matter of choice. However, with the politically sound MBA acting as the government's executive we have returned to a situation very similar to that of post-revolution Russia where the business was an adjunct of government. This is why the disparity in executive pay compared to the general labour is so acute today. And why this book is outdated.

- If you're an aficionado of the mountain man era, or long for the freedom that wilderness living brings, this tale will introduce to the saga that David Thompson has authored in his fifty-nine + books. When Nate King's uncle Zeke sends a letter asking Nate to share a treasure, little does Nate know what he is in for. Filled with action, the story moves right along, right up to the end.
