## **REVIEW OF CIMA PAST EXAM PAPERS AND ANSWERS**

- The book is gradually moving toward obsolescence, but only because other C/A Cichlid surveys have the advantage of being

written at a time when discovery of these fish is at an all-time high. It is one of the best affordable surveys of C/A Cichlids and their care and should be treated as such. Almost every common aquarium denizen from this group is covered by his masterpiece. He admits that this is but a survey during the species description chapters...it should only be read with that in mind, but, if you are a newbie to Cichlids and you have a commonly-kept C/A Cichlid, this is the book for you.

- I have grown up with the author's books, on building a PC. Considering that from 386/486 there was not much around. I have still his 486, Pent II, when I get around to it get his Pent III. I gave my son his earlier works to get started, and with a 2 week "intern" in a PC shop, he is now proudly showing me stuff. Granted his books are for the beginner/intermediate but there is just not many books out there who even attempt this. By the time they get printed, we see the next generation pent IV/giga herz which I hope the author deems to do that as well. Based on his start with some hands on and books like this and starting college he now can understand what is going on. In fact he was looking at Aubrey's Pent II book, so I will put the printout rating for Aubrey's Pent III book out, and hope there will be a similiar book on Pent III/AMD gigahertz forthcoming including the new memory, getting harddrives that are now 40-60 gigs. His pent II book was discussing sub 10 gig drives. Anyway keep up the great work. Perhaps I will get a copy of the pent III and let my sone review it, since he is now overclocking his pent III putting cooling fans everywhere. Carey
