REVIEW OF 8804675330 IT1

- The text is the best on the market. First of all, it's the biggest of all intro biology texts on the market (exceedingly large book, caught your attention on the first sight). It's also good on the inside. Texts were printed in big letters, so don't worry if you are using glasses (this is a little drawback because I prefer smaller letters). Seemed I haven't mentioned anything about its quality on biology. Its quality is UNQUESTIONABLY THE BEST. Clear, and funny (not to the extreme). The word CLEAR is so vague. So many people used it to describe good works, but the CLEAR

i used means it REALLY teaches you the important points. For example, Protein has four levels of structure. Primary, Secondary, Tertiary, Blabla... In most other texts, difference between secondary and tertiary structure was not CLEAR. IS the secondary structure caused by hydrogen bonding along the backbone? Are side chains on the amino acids involved? Other authors made it so UNclear. However Campbell made it clear (though with certain risk of being wrong). Secondary structure is SOLELY caused by hydrogen bonding along the backbone. Tertiary structure is solely caused by interactions of side chains on amino acids. I owned three texts: Starr's, Solomon's and Campbell's. The first two have been collecting dust on my bookshelf. The third are becoming used.

- This is a great fantasy series! Robert Jordan has a writing style that really puts you in the scene the way he imagined it.
