The automobile is an icon of modern technology because it includes most aspects of modern engineering, and it offers an exciting approach to engineering education. Of course there are many existing books on introductory

fluid/aero dynamics but the majority of these are too long, focussed on aerospace and don't adequately cover the basics. Therefore, there is room and a need for a concise, introductory textbook in this area. Automotive Aerodynamics fulfills this need and is an introductory textbook intended as a first course in the complex field of aero/fluid mechanics for engineering students. It introduces basic concepts and fluid properties, and covers fluid dynamic equations. Examples of automotive aerodynamics are included and the principles of computational fluid dynamics are introduced. This text also includes topics such as aeroacoustics and heat transfer which are important to engineering students and are closely related to the main topic of aero/fluid mechanics. This textbook contains complex mathematics, which not only serve as the foundation for future studies but also provide a road map for the present text. As the chapters evolve, focus is placed on more applicable examples, which can be solved in class using elementary algebra. The approach taken is designed to make the mathematics more approachable and easier to understand. Key features: Concise textbook which provides an introduction to fluid mechanics and aerodynamics, with automotive applications Written by a leading author in the field who has experience working with motor sports teams in industry Explains basic concepts and equations before progressing to cover more advanced topics Covers internal and external flows for automotive applications Covers emerging areas of aeroacoustics and heat transfer Automotive Aerodynamics is a must-have textbook for undergraduate and graduate students in automotive and

mechanical engineering, and is also a concise reference for engineers in industry.

Motoring the Future: VW and Toyota Vying for Pole Position deals with the challenges facing the global car industry today, analyzing Volkswagen and Toyota, with some surprising results. The book provides insights into each car manufacturer's corporate culture, products, production, leadership and technologies, as well as some thoughts on the future of the car. These two opponents vying for pole position could hardly be more different: Toyota, with a focus on manufacturing excellence, is dominant in its home market, the USA and south-east Asia, whereas VW, with its strategy of product excellence, leads in western Europe, Brazil and China. Industrial dominance will be important to them in the future, with both companies needing to master the next steps in product and manufacturing excellence. The race is by no means over, offering a deep insight into the challenges for carmakers moving away from fossil fueled combustion to alternative energy vehicles for the mass market. Major players are trying to answer the key question: How will the car of the future look? VW and Toyota now need to keep ambitious competitors at bay. Timing is everything: US manufacturers are focused on their own revival; Korean and Chinese players are progressing surprisingly fast. However, it looks like the battle for pole position will likely remain between Toyota and VW. *Motoring the Future* offers updates on Volkswagen's and Toyota's next generation vehicles, both plotting a new course into the future. In this thoroughly

revised edition the book, new facts and material have extended the scope to American manufacturers and to new competitors from the Far East.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the

dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

REVIEW OF 2011 VOLKSWAGEN JETTA SPORTWAGEN S

- This Vampiric novel is ravaishly colaborated by a young 15 yr. old girl. Surprisingly enough, this author has mastered the art of doing an exelent job of deeply presenting to the reader a world full of mystery and suspense. I became emotionally attached to Aubery, Jessica, and Caryn, as they ventured though out the story. I rate "Demon in My View" 5 stars, because of the novels dark, errie depth, and griping storyline.

- I love this book it's awesome. I think that This is one of her best books I own all 4 and I've read them all many times. I love how she mixes romance with drama and comedy. she's a senior at Ramsa high and shes an outsider and doesn't have any friends until alex comes to her school. Well I don't wan to ruin the bopok for anyone so just read the book you won't regrete it it's awesome!
