### **REVIEW OF ELECTRICAL PLANNING AND ENGINEERING**

- I bought this book after reading a review that it made one reader's blood boil. I was disappointed in that respect - it did not make my blood boil and I am a part time stay at home mom and work part time. I think that this book did put in print some of the "gut feelings" that many moms have after having kids but are afraid to express to their families or their working friends. I don't feel that stay at home moms get the credit they deserve as I know it is one of the hardest jobs in the world and so important. This book did not offend me as I am secure in the way that I am raising my children and think that for some people who are too swayed by other people's opinion it will be a major eye-opener. They may not like what they see.

- A book of much more depth than the "Chicken Soup" books, though it has something of the same purpose.
