REVIEW OF CONTEMPLATIVE SCIENCE WHERE BUDDHISM AND NEUROSCIENCE CONVERGE BY B ALAN WALLACE

- It was only natural that after reading Sandor Marai's "Embers" I had to read his work "Casanova in Bolzano". This is most touching and emotionally charged work I have read in a long time. The language, storytelling and dialog are compelling. The notion that all things we long for are out of reach is so true that it adds to the beauty of this work. It is a story of love, longing, desire and letting go. This book will keep readers thinking for a long time after reading is finished.

- In this book, we travel to an unnamed world where men and women have developed amazing powers, called Attributes. These people pose as ancient Hindu Gods and rule over the planet below them. Essential to their rule is to keep the people in this planet at a primitive level of technology. This they do most ruthlessly. "Sam", the binder, disagrees. He wants to aid the people below. With the aid of others, he launches a multi-phased revolution against the gods. Sam develops new religions to counter Hinduism; he makes treaties with this planet's natural inhabitants, "demons"; he actually seeks an alliance with the "evil one." No, this is not Satan. Who the evil or dark one is, however, is a nice surprise. With an amazing amount of turns and twists, grievous mistakes by "Sam", and interesting exposure to philosophy of all kinds, this book is Zelazny at his best. It compares in quality to "Nine Prince of Amber," a classic in its own right. Highly recommended for fantasy and science fiction fans.
