Based on new and existing research by a world-class scholar, this is the first book in twenty years to examine the dynamics of the entire American-West European relationship since 1945. The relationship between the United States and Western Europe has always been crucial and recent events dictate that it

is becoming ever more so. In this important new work, Geir Lundestad analyses the balance between the cooperation and conflict which has characterized this relationship in the post-war period. He examines talk of transatlantic drift, and the strain now apparent between the USA and the nation states of Western Europe. In the concluding section, Lundestad offers a topical view of the future of transatlantic interaction. Throughout the work Lundestad's much cited 'empire by invitation' thesis is both put into practice and extended in time and scope. This book is essential reading for anyone interested in one of the most important and enduring international relationships of the last sixty years.

A love-based reason theory as a new perspective in the debate on practical reasons. Reasons and obligations pervade our lives. The alarm clock gives us a reason to get up in the morning, the expectations of colleagues or clients give us a reason to do our jobs well, the misery in developing countries gives us a reason to donate money, headaches give us a reason to take an aspirin. Looking for unity in variety, philosophers wonder what makes a consideration count as a reason to do something. The nature and source of practical reasons has been debated intensively over the last three decennia in analytic philosophy. This book discusses the three most influential theories in current debates, referred to as the desire-based, the value-based, and the rationality-based theories of practical reasons. The author argues that all three are defective because they overlook the role of what agents care about.

Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and present-day African refugee camps—*Writing Architectural History* considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art

history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.

The surprising story of how George Washington, Alexander Hamilton, John Adams, and Thomas Jefferson came to despair for the future of the nation they had created Americans seldom deify their Founding Fathers any longer, but

they do still tend to venerate the Constitution and the republican government that the founders created. Strikingly, the founders themselves were far less confident in what they had wrought, particularly by the end of their lives. In fact, most of them—including George Washington, Alexander Hamilton, John Adams, and Thomas Jefferson—came to deem America's constitutional experiment an utter failure that was unlikely to last beyond their own generation. *Fears of a Setting Sun* is the first book to tell the fascinating and too-little-known story of the founders' disillusionment. As Dennis Rasmussen shows, the founders' pessimism had a variety of sources: Washington lost his faith in America's political system above all because of the rise of partisanship, Hamilton because he felt that the federal government was too weak, Adams because he believed that the people lacked civic virtue, and Jefferson because of sectional divisions laid bare by the spread of slavery. The one major founder who retained his faith in America's constitutional order to the end was James Madison, and the book also explores why he remained relatively optimistic when so many of his compatriots did not. As much as Americans today may worry about their country's future, Rasmussen reveals, the founders faced even graver problems and harbored even deeper misgivings. A vividly written account of a chapter of American history that has received too little attention, *Fears of a Setting Sun* will change the way that you look at the American founding, the Constitution, and indeed the United States itself.

**The United States and Western Europe Since 1945** Springer Science & Business Media

... the book can be recommended to all with an interest in the issue of older workers in a globalised world. Ageing and Society Early retirement has been a policy to cope with the problems of massive unemployment in many Western welfare states. However, it has become apparent that this strategy is costly and destroys human capital urgently needed in ageing societies. This book offers a comprehensive and up-to-date study of late-career patterns and processes of early retirement in fourteen OECD countries, using both cross-sectional and longitudinal data. It is an important contribution to life-course research and will provide the foundation for any serious discussion on pension reforms and increasing the employability of older workers. Hans-Jürgen Andreß, University of Cologne, Germany This timely book investigates the growth of the early retirement trend and its varying spread among different groups of older workers in fourteen modern societies. It argues for a differentiated political approach to reverse early retirement, which relies on both pension and employability policies for older workers. Examining the early retirement trend virtually all modern societies have been faced with since the onset of the globalization process in the 1970s and 1980s, this book provides a thorough analysis of older workers late careers and their retirement transitions, as well as explaining why this trend has developed differently between nations. To promote an effective reversal of the early retirement trend, national policymakers are advised not to concentrate their efforts exclusively on reducing the financial incentives for an early exit still present in most national pension systems. In addition, it is also recommended that they invest in the

employability of older workers, implying a thorough reconsideration of the design of education and labor market policies. Dirk Hofäcker presents a unique and comprehensive synthesis of theories describing and explaining the trend towards early retirement, and critically discusses their comparative advantages and shortcomings. Researchers and students of sociology, economics, gerontology, demography and comparative welfare states should not be without this book and policymakers and practitioners dealing with labor market policies will find it invaluable.

## REVIEW OF ANTWOORDEN FRANS CARTE ORANGE 3 HAVO VWO

- I'm not usually the type of person who likes to read, but when I started reading "Little Women", I could not stop. I read for hours a day, often with a flashlight in the middle of the night. I cried when

they cried, and laughed when they laughed. I felt as if the March sisters were my own, and Marmee was my second mother. As I read, I would loose myself into a world filled with love, warmth, tragedy, and hope. I have two sisters of my own, and as I read, I realized how special they are to me. The book inspired me to be a better person. I recomend this book to any woman, young or old, for the chronicles of the March family are not just a story, but a lesson in the true meaning of life;love.

- The rating is for THIS edition of the book, feminist ideologue Elaine Showalter's genital revisionism blots the text everywhere. Nor is the theme concerned with the "tension between social responsibility & individual and artistic freedom" except in the fevered dreams of academic collectivists obsessed with "group identities" who have instigated more cultural disintegration then anyone since the anarchist 60's by eroding all Individual Responsibility & intellectual standards. Since acquiring a CEO from Disney the Penguin Classics once a distinguished series has become largely a pulpit for multiculturalists, feminists, post-colonial theorists and academic careerists brainwashed by Edward Said to "re-frame" "de-construct" and deface in the name of a politically reductive, emotionally vacuous jihad against Western Culture. Showalter's a scumbag.
