REVIEW OF KINOBODY

- Oh my, this is bad! Mind you, Margaret Weis is a brilliant writer, and this book is very well written, but IMHO (and please notice that this is just MY opinion, others may beg to differ) this one comes way too close to Star Wars (SW)! Let me give you three examples: First: You have a must-be-overthrown galactic republic (led by an evil man in robes) and a must-be-reestablished galactic kingdom. Exactly as in SW except that in SW it's the republic that's "good". Second: You have a lost boy, his heritage unknown to him, brought up on a remote planet, and who is actually the one who can save the galaxy from evil tyranny. Anyone say Luke Skywalker? And third: You have the "Blood Royal", a selected few who possess extraordinary powers enabling them to control other people in certain ways. Also, these guys have special swords that shine and buzz when turned on! I, for one, have certainly met such a bunch before! Furthermore, the warlord, Mr. Derek Sagan, reminds me a little too much of a certain person, who's clad in black and has breathing problems. This Derek Sagan thing does, however, change as the story progresses (a change that, to me, is rather peculiar, though!), and the presence of SW-similarities dwindles later in the series. Another annoying point was the recurring references to certain great writers and thinkers and the like of the past (those made by the characters in the book and hence NOT the ones prior to each chapter). I take it these 4 Star of the Guardians books are supposed to take place far into the future. Maybe even

thousands of years have passed - mankind has after all colonized several planets, and something great is bound to have been achieved. But apparently no great books have been written and no new, daring philosophies have been made. At least none we hear of! "20th century"-persons are mentioned every now and again, but never any from the 25th or the 28th centuries. Come on! Some books of importance must have been written in that time! Neither does the plot offer anything new. It's not bad, I've just seen it too many times before: Evil must be defeated - good must prevail. There are no twists in this particular version of that good old story, just a straight (slightly boring) line. This is definitely NOT Margaret Weis standard! Usually what she writes is damn good, we all know what she's capable of writing both on her own and together with Hickman, Perrin or Baldwin. And that is why I can only give this book (and the entire series for that matter) one star, even though it's well written with juicy descriptions of the environments. But again, this is after all just my opinion

- After reading this book I can only say that the author is selling something unreal, the figures he uses in the book are totally unrealistic. Talking about 10 and 12 to 15 percent returns on investment, like they are the readers just for the taking. His advice reminds me of the old Steve Martin shtick on how to become a millionaire, Steve says "O.k. first you get a million dollars then..." This is basically what the author is saying, This book has no real practical advice, It is just another author getting rich telling everyone else how to. Very disappointing, I would not waste my money if I were you.
