REVIEW OF WINDOWS POWERSHELL 4 0 FOR NET DEVELOPERS TALAAAT SHERIF

- Author Thomas Chittum has written a scary account of civil war that might break out in America. He has been a soldier of fortune in various conflicts and looks at social events from a military perspective. He has a sweeping knowledge of ethnic conflict and revolutions around the globe and uses such examples of conflict to prove his point that America may

soon face an ethnic civil war. One of his main points is that most countries that are multi-ethnic usually have ethnic-based civil wars. Countries that are almost mono-ethnic do not. He gives examples of such countries. Once a country's majority ethnic group dips below 70 percent serious ethnic troubles begin. He gives warning signs of what these ethnic troubles will be and how they signal a coming civil war. According to Chittum, America is fast turning into an undemocratic, multi-ethnic empire that is inherently unstable, unlike mono-ethnic nations. The elite upper class intends to break the power of the white working class in America and make them serfs in a multi-ethnic empire by using what he calls "racist" affirmative action, gun confiscation, and uncontrolled immigration and its attendant wage deterioration. He believes that this elite plan to control America in such a way will not work and eventually America will have a civil war. Chittum shows the areas in which he thinks that the multi-ethnic empire will split into and advises people to go to where their ethnic group will be. He gives other survivalist tips for the coming civil war. He has some great quotes about human nature and the nature of war and has some gallows humor sprinkled throughout the book. The coming civil war will be vicious, he says,

given the vast differences between the combatants and inability to give land away peacefully because of the mixing of ethnic groups in the same territory. He says it will be a lot like the war in the Balkans.

- This book is in my library because the man had an insight, on coming events. He wrote this book in 1995, and talks, relates on issues that are taking place as we speak. For one, Mexican army incursions into the southwest. This was on 60 minutes, with

footage, so don't say it didn't happen. This book outlines how to prepare, how to protect, and to keep our species (white) alive. You are going to need survival skills in the future, so you better start now. For those of you who can't smell the coffee yet, I hope God loves you, because to do nothing, you're going to need it. This is no joke, look at the events in this country right now, tell me everything is rosy, if so, you're a fool, and may God have mercy on your soul!
