## **REVIEW OF NETOBJECTS FUSION USER GUIDE**

- I thought it would be nice to read the book before going to see the movie. However, after reading the book, I do not want to see the movie at all. There are a lot of cheap thrills in the book...the play on bodily functions, while funny, is dull after awhile. Duddit's cancer and Down's Syndrome seem somewhat overly dramatic, like the book is trying too hard. Plus, by page 200, I cannot help

but feel stupid for reading the book. Nothing in the book is fresh or imaginative. The emotions that are supposed to be stirred up are unconvincing and uninspiring. Although the plot is interesting enough for me to want to find out what happens at the end, I feel like I wasted a lot of time reading all 600+ pages of it when I finished it. If you are a Stephen King fan, this may satisfy you. However, if you are not a fan, don't bother.

- Because "Dreamcatcher" is the novel Stephen King wrote (in longhand) while recuperating from his near-fatal accident, it easily lends itself to all sorts of psychological interpretations. After all, one of the characters is hit by a car and breaks a hip. To me, the first part of the book comes across as a melting pot of familiar elements from King books: once upon a time there was a group of four boys who were best friends ("The Body"), who become involved in stopping a great evil as adults ("It"), because of a spaceship that has landed in the woods ("The Tommyknockers") and a horrible infection is spreading around ("The Stand"). Fortunately they have some psychic ability ("The Dead Zone") that will help them not only with the aliens but also with the psycho running the government operation ("Firestarter"). For good measure, throw in literary homages to the original "Invasion of the Body Snatchers" and "Alien" with a generous twist of "The X-Files," while keeping in mind that not everybody gets out alive in a Stephen King novel, and you have the general picture of what "Dreamcatcher" is about. The four friends--Joe

"Beaver" Clarendon, Pete Moore, Henry Devlin and Gary Jones--are bound together in a way that they do not even suspect. Beaver is an inventive curser who owns a cabin in the Maine woods where the group gathers for the last time, Pete can find lost car keys or anything else when he puts his mind to it, Henry is a suicidal shrink who has a tendency to lash out at patients from time to time, and Jonsey is a college professor who just "knows" when students cheat on exams. The common link in their lives is Duddits (but I am not letting that particular cat out of the bag--read the book). When Richard McCarthy stumbles out of the woods, dazed and confused, not to mention the worst case of flatulence in the history of civilization, the group has no idea that they are on the edge of the end of the world as we know it. "Dreamcatcher" is not a great Stephen King book and even while it rehashes some familiar elements once all the pieces are in place the guy knows how to tell a story. The idea that the right people are in the right place at the right time can come across as either heavy-handed coincidence or another instantiation of King's faith in the hand of the divine. Certainly, it does not work as seamlessly as it does in "The Stand." Be warned: this book contains some of the grossest scenes King has ever created (i.e., do not read parts of this book while eating). This is not a book for King neophytes, but for his fans. In the final analysis, the important thing about "Dreamcatcher" was that the man is up and writing again.
