International Program Committee Bell Laboratories Murray Hill, New Jersey, USA The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the

learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

A most remarkable series of linked stories, encompassing a young working-class Englishman's coming of age, written with great humour and pathos. This is Royston Tester's first book, but he has already been nominated for a slew of awards, been published widely (and internationally, in both journals and the Lambda-prize finalist anthology *The Love That Dare Not Speak Its Name: Essays on Queer Sexuality and Desire*), and charmed the CanLit establishment. His writing is very English, and in a spectacular way; his language is both elegant and colloquial, and always riveting.

A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al- Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book

could not be timelier. With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

REVIEW OF DECIMALS AND MONEY BBC

- This is a very good series. It takes some time to write a good book so I'm being patient waiting for number 8. I only started the series in 1997 I therefore have not had a long wait in between titles. It is refreshing to note the many positive statements being made by fantasy enthusiasts. So many

"so called" intellectuals who only read biographies and factual texts, denigrate lovers of fantasy and science fiction. If they only realised that sometimes you need escapism to rekindle your humanity. Enough of this - go for it Robert J. your series is worth waiting for.

- Robert Jordan's series carries on nicely through the seven books. You need a lot of spare time in order to read the series but it is very very good. It does get a little wordy through the books but they tend to keep my intrest. I don't really know how to explains these but they're a must read for fantasy readers.
