REVIEW OF NEUROSCIENCE CONSCIOUSNES S AND SPIRITUALITY STUDIES IN NEUROSCIENCE CONSCIOUSNES S AND

SPIRITUALITY

- I was thrilled when I found this for my daughter, but was rather disappointed when it arrived. It is very small, about the size of a smaller notecard. The pictures inside are fabulous, just very small. The price printed on the back of the book is cheaper than the price I paid for it. If only they were bigger, even for a couple of dollars more, I think they would have been worth 5 stars.
- Every once in a while, a new book comes along that at once entertains, startles and entertains- and refuses to be put down or forgotten. Such a great book is The Smithy Miracles by J. Denis Glover (iUniverse 2004). It takes its place among

other notable and unforgettable books as Ishi: Last of His Tribe by Theodora Kroeber (1964); The Pond by Robert Murphy (1964); and The Cay by Theodore Taylor (1968), to name but a few that come immediately to mind. "Smithy" is a novel that is a giant metaphor for life. Parts of the story describe the basest human thoughts and actions: prejudice, cruelty, hate and the like. These are offset by the greater portions that illustrate life as it can be lived. One forgets that this is a novel. The descriptions are brilliant! "Canopied rusted remains of shingle machines, crouching like raptors in molding caves," is only a minute sampling. Sonny's Papa has plenty to say about life: "Let's jis' say we choose to pin that note on ourself, or we don't. We got that choice, but we're gonna find out don't make no difference. None of us goes nowhere `cuz everywhere's here, you see?" Yes, Sonny, all the `notes' (labels) in the world are written by men who can't see what you now see. Readers of good literature, get this book! When you finally lay it aside, it remains with you.
