Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? REVIEW OF IMPALA ENGINE COOLING DIAGRAM

- The name of my book is *Hound of The Baskervilles*. In this book the main character is sir Charles Baskervilles. He is a very important man then one night he dies. But he was found dead outside during his evening walk. So it is up to Sherlock Holmes to find out if this was caused by natural causes or it was rough play. Sherlock has little time to solve the mystery before his nephew receives his place as a rich tycoon. I did not like this book and do not suggest this to anyone.

- I really enjoyed reading *The Hound of the Baskervilles*. I thought it was very exciting and suspenseful. Conan Doyle uses a very elevated vocabulary which may not be appropriate for young people. Also Conan Doyle does a great job of illustrating to us what Baskerville Hall might look like and what the moor may

seem like at midnight on a cloudy evening. He also depicts the characters very well and he did a great job with the death scenes. I was a little disappointed that the book was not more scary. It was not the best I have ever read but The Hound of the Baskervilles was certainly a great book.
