REVIEW OF 300 SERIES TOSHIBA TEC

- This year I read dune. It was the greatest book I had ever read but it was very complicated. When I figured out I had to do a short summary of dune for a book report

in front of my class I was mad. I couldn't do a short summary on dune because it was such a complicated and interesting book, and how was I suppose to explain a complicated book like that to my fellow classmates in a short summary. Well I ended up getting a "C." Dune is a great book for people above 18 but not for an 11 year old like me.

- This book is not really helpful for teachers in methods classes. I was not impressed with the lay out, or the accessibility to information. I consider this book a waste of my money!
