The Dentistry interview book is the number one selling dentistry book worldwide, providing an up-to-date review of the most common questions, with full answers and pointers on what the interviewers are looking for. Described as the 'essential guide', it is a vital resource as part of your preparation. Example question: Consider the case of nine year old Rebecca who comes in to surgery with her parents. This is her first dental visit. She has been kept awake with a painful tooth. Examination shows that she has several decayed teeth and that a lower right primary molar is causing the present pain. Rebecca is crying and climbing out of the dental chair. What is the best way to handle this situation. Clinically Rebecca's case draws on various themes. Without starting your undergraduate training you will not need to know about the clinical implications in detail. However, an understanding of the themes will make you stand out. A common answer is to indicate that some dentists may consider writing a brief referral letter to the local hospital for this tooth to be extracted with a general anaesthetic. The questions that you want to be thinking about clinically are:

- Can this tooth be restored or does it need extraction?
- What are the implications if I extract in the future (orthodontically can it have consequences)?
- Does the patient need General Anaesthetic or can this be

managed within practice under Local Anaesthetic. • Rebecca has other dental needs as stated and has never attended a dentist before, how would I like to manage this to cause her the least upset? All of the above would require consideration of who would be consenting for the patient. In this case at 9 years old, the patient would require a parent or legal guardian to consent for her. 'Gillick Competence' allows for a child up to the age of eighteen to make their own decision regarding their care. However, the dentist must carefully assess that all the criteria for valid consent detailed in question four are present. There is particular emphasis placed on the patient's ability to understand and retain all the information given and communicate their reasoned decision. 'Gillick Competence' will be more relevant for scenarios where the child in question is slightly older. The ethical and legal responsibility to respect children as well as those who support them is essential in establishing strong professional relationships. In this particular situation explaining the options and offering choices will help the parents to make their decisions appropriately after understanding what's on offer, which in turn will increase the likelihood of co-operation, whichever option is finally decided upon. For Example: "The dentist should tell the family about the options and explain how the pain can be controlled with analgesics and a simple dressing. He /she should explain that it may be wise to slowly introduce Rebecca to dental care so that she becomes familiar with the dental environment before starting treatment. In this way he is enforcing the act of beneficence by acting in the patient's best interests and enabling the child's parents to make an informed

decision- thereby enabling autonomy" Topics covered: GENERAL POINTS TO CONSIDER TRADITIONAL INTERVIEWS AND MMIS SCIENCE QUESTIONS ETHICAL QUESTIONS ABOUT THE UNIVERSITY PERSONAL QUALITIES ABOUT YOU WORK EXPERIENCE AND EDUCATION DENTAL & INDUSTRY DENTISTRY IN THE NHS CURRENT AFFAIRS Want to be tutored by the authors for your dentistry interview? ## **REVIEW OF DENTAL NURSE QUESTION AND ANSWER BOOK**

- i always wanted to read this book. the first time i heard about this book was just after i saw the movie with the same title. in the movie the boy requested not to hear about the kissing parts - and i always wanted to know what i was missing. so i searched for the book. when i started reading it i thought it was a bit wired that the writer wrote 30 pages about himself and not about the story... - but it was worth it! the story has everything!: LOVE - MONSTERS - BAD GUYS - GOOD GUYS - MAGIC. it is the best book i read in a long time.RUN AND GET IT!!!!!!!!!!!!!!

- This book has played an important role in my life. I bet there aren't a lot of people who can say they graduated college because of \_The Princess Bride\_!Mind you, I agree with some

people that the book has its problems. For instance, people look at you funny on a Greyhound when you're reading something and start laughing nearly uncontrollably. And other people, who have never read any fantasy in their lives are like, "How can you read this stuff? Aren't you too old for stuff like this?" As a matter of fact, no. I love this book. As a young woman with very little prospects in the way of love, this book gave me hope that, someday, some guy would look at me and see what was truly going on inside my head. So long as I kept saying, "As you wish." :) But what I really love is the blend of 'in character' and 'out of character' that

Goldman does. It's an interesting narrative technique that I have never seen used outside this book. For the record, Goldman's family wasn't like that at all. He doesn't have a son, he has two daughters. And I forget what his wife really did, but she was nothing like the woman he describes in the book. This book is fiction. Of course, no names were changed to protect the innocent. In this book, nobody is innocent. Except maybe Morgenstern, since he had absolutely nothing to do with it. Oh...and how did I graduate college because of this book? I wrote my senior paper on The Princess Bride and the narrative structure found within it. Don't laugh. I got a B+.
