The future of politics after the pandemic COVID-19 exposed the pre-existing conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? The *Revenge of the Real* envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Bratton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new rationality of inclusion, care, and prevention.

Lieutenant Jodenny Scott is a hero. She has the medals and the scars to prove it. She thinks she can handle it all. She's wrong. Aral Sea isn't a happy ship. And it's about to get a lot unhappier. As Aral Sea enters the Alcheringa -- the alien-constructed space warp that allows giant settler-ships to travel between worlds, away from all help or hope -- Jodenny comes face to face something powerful enough to dwarf even the unknown force that destroyed her last ship and left her with missing memories and bloody nightmares. Lieutenant Jodenny Scott is about to be introduced to love. Author Sandra McDonald brings her personal knowledge of the military, and of the subtle interplay between men and women on deployment, to a stirring tale that mixes ancient Australian folklore with the colonization of the stars. REVIEW OF WHAT PRICE PARADISE KATHERINE ALLRED

- The field of wireless personal communications is experiencing rapid growth worldwide. Most clearly seen in the huge uptake of cellphones in Europe, Japan and, to a lesser extent, the United States and China. Plus, WiFi has taken off strongly in the developed world, with enhanced 802.11 standards being quickly solidified and adopted. This volume, as of its writing in 2000, describes much of the

engineering and theoretical underpinning of this field. It does not have the 802.11 standards that came out after 2000, but much of the book is still very germane. There is no lack of research interest in this field, driven in no small part by the anticipation that nomadic computer and the rise of the pervasive Web have yet to occur. Still early days for those, we hope. The field contains tough issues, as may be seen in several papers in the book. In earlier decades, wireless communications were often to and from antennas at fixed locations, with ample power. Or, if the antennas were mobile, like on planes, usually power was not a consideration. Nor the possible maximum length of the antennas. But in modern personal mobile uses, the constraints are far tighter. Power must be minimized, and you cannot draw out a one meter antenna. Which gives great potential for researchers like yourself to invent and commercialise new applications, if you can overcome these challenges, aided perhaps by ideas in this book!

- I love romance novels that are clean, This was a very sweet book and fit into this category! After reading it I downloaded all the books by the author, Margaret Widdemer, free! I've not read any of the other ones yet.
