During the seventeenth and eighteenth centuries, France became notorious across Europe for its ambitious attempts to codify and theorise a system of universally valid 'rules' for successful theatre. Inventing the Spectator reads the period's dramatic theory against the grain, exploring not plays or playwrights but rather the spectator: the living, breathing individual in whose mind, senses, and experience the theatre comes to life. Bridging the gap between literary and theatre studies, history of psychology, and intellectual history, Inventing the Spectator reconstructs the theatre spectator's experience as it was understood in France between the Renaissance and the Revolution. As well as offering in-depth discussions of key dramatic theoreticians (d'Aubignac, Corneille, Dubos, Rousseau, and Diderot), this study raises numerous questions - of imagination and illusion, reason and emotion, pleasure and narrative, vision and hearing, interest and identification - that strike at the very heart of human psychology, cognition, and experience.

True Principles of Pointed or Christian Architecture was first published in 1841, when Pugin was 29 years old. Here he presents coherent arguments for the revival of the Gothic style, the case for which he had made pictorially in his sensational book *Contrasts* (1836). For Pugin, the Gothic Revival was 'not a style, but a principle' and this he laid down in his most influential architectural treatise, *True Principles*, which introduced functionalist and rationalist as well as moral criteria into architectural discourse, much of it still resonant in the twentieth-century Modern Movement. It is reprinted together with his *Apology for the Revival of Christian Architecture*, first printed in 1843. Much of his thought here is on architectural education, and in shuffling off the straitjacket of neoclassical architectural principles Pugin exercised a great influence in mid-Victorian architecture and the applied arts, and in a wider design reform movement. These two seminal books, presented in one volume, are introduced by the architectural historian and Pugin authority Dr Roderick O'Donnell

FROM THE STAR of the award-winning BBC sitcom *Miranda*, comes Miranda Hart's hilarious account of life with her beloved dog Peggy, a gorgeous white bichon frise. 'Hilariously funny and often moving memoir ... we loved every word *****' Heat 'Open, honest ... her misadventures are hilariously described ... charming and funny' Daily Express ***** Hello dear book browser and welcome to Peggy & Me, the story of my life since getting a beautiful Shih-Tzu Bichon Frise cross puppy (I call the breed a Shitty Frise - fun) in the form of Peggy. Some of you may be thinking: "a book about a dog, how totally brilliant, I need hear no more, I'm sold." In which case we should be best friends and go out to tea together, every day. Others of you may be thinking: "a book about a dog, how totally mad, she must have officially lost it." In which case I completely understand. For I once viewed dog owners with much suspicion. The way they obsessively talk about their dogs often using voices for them to reply; the way they have a light covering of dog hair all over their clothes and sofas; and worse, an alarming comfort and ease around excrement. But I now get why people become so mad about their hounds. It wasn't instant love I have to admit. Getting a puppy when I was at a low ebb in my life wasn't easy - there was a lot of challenging, what I call, dog administration (dog-min), and the humiliating first trip to the vet still haunts me. It's been a bumpy old road, but Peggy has been lovingly by my side through some life-changing moments and I

wouldn't have coped without her. Most surprisingly she has taught me a huge amount - not how to get an old pie packet out of a bin and lick it (I could already do that), but real lessons about life and love and trust and friendship. Put aside any doggy reservations and come walkies with Peggy and me ...

The World Wide Web has enabled the creation of a global information space comprising linked documents. As the Web becomes ever more enmeshed with our daily lives, there is a growing desire for direct access to raw data not currently available on the Web or bound up in hypertext documents. Linked Data provides a publishing paradigm in which not only documents, but also data, can be a first class citizen of the Web, thereby enabling the extension of the Web with a global data space based on open standards - the Web of Data. In this Synthesis lecture we provide readers with a detailed technical introduction to Linked Data. We begin by outlining the basic principles of Linked Data, including coverage of relevant aspects of Web architecture. The remainder of the text is based around two main themes - the publication and consumption of Linked Data. Drawing on a practical Linked Data scenario, we provide guidance and best practices on: architectural approaches to publishing Linked Data; choosing URIs and vocabularies to identify and describe resources; deciding what data to return in a description of a resource on the Web; methods and frameworks for automated linking of data sets; and testing and debugging approaches for Linked Data deployments. We give an overview of existing Linked Data applications and then examine the architectures that are used to consume Linked Data from the Web, alongside existing tools and frameworks that enable these. Readers can expect to gain a rich technical understanding of Linked Data fundamentals, as the basis for application development, research or further study. History: A Very Short Introduction Oxford University Press

When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

The Faber Book of Beasts is a collection of many of the best poems in English about the creatures who share our planet. The animal kingdom has prompted some of the liveliest and most enjoyable writing by poets, from Homer to our contemporaries. Among the creatures gathered here, tame or wild; common or exotic, are mammals, reptiles, birds, insects, and others perhaps more fanciful than real. A zoologist's delight. There is, too, a moral or philosophical purpose. As Paul Muldoon says in his introduction: 'We are most human in the presence of animals.' And it is just this sense of how our humanity is illuminated by the contemplation of bestial life that he has set out to celebrate. The results are wonderfully rich and thought-provoking.
