Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science

major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and

coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of

adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum

materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area--Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type--core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and

periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed--and the only guide of its kind--*Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on

science teaching, and concerned parents.

REVIEW OF PROPERTIES OF WATER LAB ANSWERS

- Within the next revisions of this magnificent book, you will find one single low rate provided by Mr. Chad Woodburn, in which he ascribes a letter to Benjamin Franklin, condemning Thomas Paine for writing The Age of Reason. I find it very difficult to be true, since Ben Franklin died in 1790 while The Age of Reason was written in late 1793. This sort of logical criteria, is the one that Thomas Paine

uses throughout his book to unmask lies told to us from early childhood.

- Charles Mann has done an absolutely smashing job of telling us a lot of things most of us didn't know about the Pre-Columbian North and South Americas - so many things in fact that, having just put the book down, I have a surfeit of information which I will never remember but enjoyed taking in. He's done his homework from a bibliography which lists out at 43 full pages; and, while some academics are sure to find some factual inaccuracies and while his prejudices show through occasionally, it's a great read for the general public - which certainly includes this writer. The book is a

kind of "Gee-Whiz-I didn't-know-that-before" affair which will provide you with the material for several interesting dinner table conversations as well as dispelling any ideas you may have had that the Pre-Columbian Americas were lightly populated (they weren't) or that their peoples were "backward" (most certainly not) or that a few "Indians" walked across the Bering Strait 10,000 years ago and settled the Americas (That's not so either, although some did enter this way.) So please read it and be enthralled with a new view of the Old Americas. It casts new archeological anthropological light on that Old World. Caution: Please pay close attention to

the speed at which new diseases killed, eradicated, wiped out whole civilizations in a generation and consider whether this could happen again in our present highly complex technical world today. It's a sobering thought, isn't it?
