• "Kneel, or you will be knelt."Has there been a more powerful or significant sentence in this series? The seeds of mistrust have been sown in Rand, and we have to wonder if the 'Chaos' in the book's title refers to the events that mistrust engenders, or the maelstrom in the Dragon Reborn's mind. Before that moment, we have rooted for Rand, empathized with him... But now we are more aware than ever of the power he wields, and the delicate balance he struggles to maintain between sanity and insanity.LOC is RJ greatest accomplishment to date, a complex, involving book with a

dizzying number of subplots, plot twists, and powerful scenes. Take Egwene's character: she admits things and meets her toh with an Aiel's courage, then uses the world of dreams to get to Salidar, then find out someone wants her for something, then begins to manipulate them with a skill that would make Moiraine proud. Now consider that Egwene was basically a MINOR character in this book, and you can see how detailed LOC really is. RJ stuffs a lot into 700 pages (hardcover) and none of it seems extraneous or indulgent. PLOTTING: So many things happen to advance the main plot that I have to wonder how RJ keeps track of it all. Does he have a big blackboard at home where he

diagrams the whole thing, or what? LOC has enough plot threads to weave a sweater with, and he manages to cover everybody important. The opening prologue is an excellent example of RJ getting us up to speed on what minor and major characters are doing, and he does the same thing in the epilogue, too. CHARACTERIZATION: We thought Rand was a hard man before, but after Dumai's Wells...Wow. Talk about your earth-shaking psychological impact. We also see Egwene settling into her role as a forceful, crafty leader, and Perrin as the reluctant hero, while Mat unwittingly becomes a father figure to young Olver. PACING: Despite juggling so many plot

threads, RJ never slows the pace, using alternate threads to create an ebb and flow effect. For example, right Rand gets kidnapped, RJ jumps to Ebou Dar to heighten the suspense of the former thread. BEST SCENE: It has to be Dumai's Wells. No scene in the series has been more powerful, or more unforgettable. I can still see the Asha'man exploding the Shaido to bits in my mind. (Try getting that by TV censors!) MOST POV: This is a tough call. It's probably Rand, but I'd have to count chapters to be sure, because Egwene, Min, Elayne, Mat and Perrin all get a lot of attention. Then there's all the minor characters, from Pedron Niall and Morgase to Sammael

and Graendal, who get paragraphs and chapters. OVERALL: For better or worse, LOC is the book that all future volumes will be compared with, and I know that sounds unfair, but...Let me put it this way - I just finished reading it, and I could read it again right away. That's how much I loved reading LOC. Sorry for my rambling on, and making the review so long. Hope it helps!

- DED are a direct derivative of designer's republic and they know it. It is not enough that they are in the same building and that they use the same design styles and that they steal the look, feel and personality of DR... they had to go and publish this truly pedestrian book. DED are perfect examples

of pragmatic, your goal in life is to be
uninteresting, a low-level production
mediocre artist who cuts up the
designers. Read this if work of others.
