Malcolm McKenzie will never forget that night in New York when he put Ava Galvan in a taxi following a heated argument, and the Argentine beauty was involved in a horrific accident—one that ended her career as an acclaimed soloist with the Manhattan Ballet, and impaired her memory and ability to live an independent life. The Scottish tycoon and philanthropist lives with his guilt, and another consequence: Ava was pregnant with his child the night of the accident. Ever since that night, Malcom has raised Jack as a single father. But Ava is stronger now, and Jack wants his mommy to come home. Malcolm has never stopped wanting her and he's determined to do whatever it takes to claim Ava—with or without her consent.

REVIEW OF MISSING YOU SHEET MUSIC

- It's hard to write a review of a Horatio Hornblower book that is less than superlative. But I must in this case. Hornblower during the Crisis is probably only of interest to Hornblower fanatics. It is the incomplete (and unedited) beginning of a story Forester was writing when he died -- matched up with two short stories about Hornblower. None of these stories are very good. I'll avoid revealing plot details as all three hinge on unlikely and rather obvious plot twists. The main story, which tells of the events between Hornblower leaving the Hotspur and the Battle of Trafalgar, drags a bit and stops right when it was going to get interesting. The next tells of an event in Horatio's early history --

an unpleasant one that seems to contradict his character. The last is an encounter near the end of his career and is rather amusing but not exciting in the least. Again, this book might be worth buying if you are interested in completing a collection (although, even then, the price is ridiculous). But casual readers should steer a course to the other ten novels.

- I've been reading (and buying) more books lately that have New Age themes. For some reason, I seem to crave such knowledge -- especially regarding the environment and our spiritual ties to it. The Hidden Messages in Water caught my attention immediately and quickly found its way to my home. There's no way for me (as a layperson) to prove or disprove Dr. Emoto's thesis. I'd have to recreate his experiments and take incredible photographs of water molecules from all over the world. No way. One of the reviewers who claims to have a connection with Dr. Emoto gave me pause to wonder what's really going on behind the scenes with the man. Could all of this be a hoax? Sure it could. But here's how I look at it: Even if his research methods are sloppy, I don't think that detracts from the message of his book. And his message is that water is crucial to life. Without it, we die. It's that simple. What worries me about Dr. Emoto's detractors is that people may throw the baby out with the bath water (no pun intended). Let's look at the facts: 1. Human beings are made up of 70% water. 2. Pure, fresh water is becoming more scarce every day. Hypothesis Question 1: What will happen to people (on a molecular level) when their sources of water are tainted? Hypothesis Question 2: Is water "alive" and able to respond to environmental stimuli (much like

plants)? Hypothesis Question 3: How much like water are people? Meaning, if we study water, are we also studying ourselves? My personal opinion (for whatever it's worth) is that I believe Dr. Emoto's research -- regardless of how far-fetched it may seem. Why? I'm not sure why. But I think it's because I can't argue with the facts. People are 70% water. The earth is 70% water. Interesting coincidence. I don't know what to make of that. But the coincidence is intriguing. Enough so that it gives me pause to dismiss Dr. Emoto's photographs and conclusions. The conclusions derived from this line of thinking are staggering. What if water *does* react to environmental stimuli? Would that not mean that the earth, too, might also be "alive" in some sense, also reacting to environmental stimuli? Many religions and cultures down through the ages have affirmed as much. What if Dr. Emoto is finally proving that to be true? Bottom line: I believe this book. I have no proof to back up that statement, however. I'm going by sheer gut feeling. I think there's more to this world that we don't see than we do see. For example, the fact that every solid object is really -- at the atomic level -- merely a collection of whirling protons, neutrons and electrons freaks me out. I can't see them. But scientists tell me they're there. In constant motion. Vibrating at a specific, unique frequency. So that, in reality, nothing is truly solid. I have no proof of that. Yet I believe it. If Dr. Emoto's book does nothing except raise the level of awareness regarding the importance of water, I think it would have served its purpose. Even if water isn't alive as he claims, the fact remains that we can't live without it. We need to do all we can to preserve and protect it! Read the book. Draw your own conclusions.
