Johannes Tinctoris... UPNE

These nine essays consider for the first time the day-to-day performing practice of English composers of choral music of the period 1440-1650.

Clarendon Press

The Sound of Medieval Song is a study of how sacred and secular music was actually sung during the Middle Ages. The source of the information is the actual notation in the early manuscripts as well as statements found in approximately 50 theoretical treatises written between the years 600-1500. The writings describe various singing practices and both desirable and undesirable vocal techniques, providing a fairly accurate picture of how singers approached the music of the period. Detailed descriptions of the types and uses of improvised ornament indicate that in performance the music was highly ornate, and included trill, gliss, reverberation, pulsation, pitch inflection, non-diatonic tones, and cadenza-like passages of various lengths. The treatises also provide evidence of stylistic differences in various geographical locations. McGee draws conclusions about the kind of vocal production and techniques necessary in order to reproduce the music as it was performed during the Middle Ages, aligning the practices much more closely with those of the Middle East than has ever been previously acknowledged.

Angel Song: Medieval English Music in History Cambridge University Press

This book deals with various aspects of musical life at the Aragonese court of Naples, from its establishment in 1442 to its demise in the opening years of the sixteenth century. An opening chapter gives a general historical-cultural background of the court. The author then discusses the royal chapel and its most important members, as well as other important musicians who were in Naples but who had no known ties with the court in an official sense. He goes on to describe the various types of secular music at the court and the music manuscripts compiled in and around Naples. The importance of the book lies in its attempt to synthesize all that is known about music at Naples - both from discovered archival sources and from the scholarly literature of specialized studies. The second part of the book contains a collection of 18 pieces, edited from Neapolitan manuscripts, which illustrate the earlier chapter on the repertory.

CONCLUSION

Rhetoric Beyond Words Cambridge University Press

As a distinguished scholar of Renaissance music, James Haar has had an abiding influence on how musicology is undertaken, owing in great measure to a substantial body of articles published over

the past three decades. Collected here for the first time are representative pieces from those years, covering diverse themes of continuing interest to him and his readers: music in Renaissance culture, problems of theory as well as the Italian madrigal in the sixteenth century, the figures of Antonfrancesco Doni and Giovanthomaso Cimello, and the nineteenth century's views of early music. In this collection, the same subject is seen from several angles, and thus gives a rich context for further exploration. Haar was one of the first to recognize the value of cultural study. His work also reminds us that the close study of the music itself is equally important. The articles contained in this book show the author's conviction that a good way to address large problems is to begin by focusing on small ones. Originally published in 1998. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Eight Centuries of Writings Cambridge University Press

Generic Interconnectivity in Fifteenth-century Music Princeton University Press

This volume draws on emerging scholarship at the intersection of two already vibrant fields: medieval material culture and medieval sensory experience. The rich potential of medieval matter (most obviously manuscripts and visual imagery, but also liturgical objects, coins, textiles, architecture, graves, etc.) to complement and even transcend purely textual sources is by now well established in medieval scholarship across the disciplines. So, too, attention to medieval sensory experiences—most prominently emotion—has transformed our understanding of medieval religious life and spirituality, violence, power, and authority, friendship, and constructions of both the self and the other. Our purpose in this volume is to draw the two approaches together, plumbing medieval material sources for traces of sensory experience - above all ephemeral and physical experiences that, unlike emotion, are rarely fully described or articulated in texts.

The Art of Counterpoint (Liber de Arte Contrapuncti) Translated and Edited with an Introd. by Albert Seay Springer

In his Dictionary of Musical Terms (ca. 1475) and Art of Counterpoint (1477), theorist and composer Johannes Tinctoris famously articulated a threefold hierarchy of music genres

consisting of song, motet, and mass. Musicologists have traditionally attached significant weight to Tinctoris's tripartite scheme, analyzing each genre independently, considering the origins of each separately, and organizing modern editions in terms of genre. My dissertation focuses on the myriad ways in which musicians connected genres to one another in the fifteenth century, quoting secular songs in masses and motets; composing motets in the style of songs, re-texting songs so that they could be sung as motets, and subsuming liturgical chant into the texture and context of courtly songs; combining motets into substitute mass cycles, and even extracting mass sections and re-texting them as songs. Whereas some of these interconnections, masses based on songs in particular, have received a good deal of scholarly attention, others such as motets based on songs, have largely gone unrecognized. By considering genres not in isolation but in communication with one another, my dissertation makes the case for genre as a determinant of borrowing practices. Moreover, I argue that dissimilarity between genres was a driving force behind their commingling. Recognizing the significance and pervasiveness of generic interconnectivity sheds new light on some of the thorniest issues of the fifteenth century, including the style of Josquin's famous Ave Maria ... virgo serena; the origins of and relationship between Ockeghem's D'ung aultre amer, the motet Tu solus, qui facis mirabilia, and the Missa D'ung aultre amer, both attributed to Josquin; and the motet cycle Vultum tuum.

The Music of Johannes Tinctoris (ca. 1435-1511) W. W. Norton & Company

Though individual pieces from the late fifteenth century are widely accepted as being written for instruments rather than voices, they are traditionally considered as exceptions within the context of a mainstream of vocal polyphony. After a rigorous examination of the criteria by which music of this period may be judged to be instrumental, Dr Jon Banks isolates all such pieces and establishes them as an explicit genre alongside the more commonly recognized vocal forms of the period. The distribution of these pieces in the manuscript and early printed sources of the time demonstrate how central instrumental consorts were to musical experience in Italy at this time. Banks also explores the social background to Italian music-making, and particularly the changing status of instrumentalists with respect to other musicians. Convincing evidence is put forward in particular for the lute ensemble to be a likely performance context for many of the surviving sources. The book is not intended to be a prescriptive account for the role of instruments in late medieval music, but instead restores an impressive but largely overlooked consort repertory to its rightful place in the history of music.

REVIEW OF JOHANNES TINCTORIS THE ART OF COUNTERPOINT 1477

- In *Slaves of Obsession*, Anne Perry has expanded Hester and Monk's world to include a trip to America at the start of the Civil War. Monk finds war horrific. Having always considered himself a brave man able to face death he is frightened by his reaction to the destruction. On the other hand Hester rises to the occasion. Her battle experience puts her in the position of strength. This glimpse into his wife's past fills Monk with admiration and a greater understanding of Hester's past. All the characters have a noble obsession, which contributes to their downfall. Whether it is love or glory or freedom it infects their reason bringing death in its wake. The plot is clever and holds the reader's interest. An excellent novel, I highly recommend it

- I read this book as a choice in literature class. Reading usually isn't my thing but this book caught my eye. I enjoyed watching the movie *Simon Burch* and the plot seemed to me as if the movie was based on the book *Of Mice and Men*. Although *Simon Burch* is based on the book *A Prayer for Owen Meany*, the significance of this book ties in with *Of Mice and Men*. This book is based on an everlasting friendship between George and Lennie. George is a short man and somewhat smart. Lennie was a tall and muscular man; but seems younger because of his retardation. They were two men with a dream looking for work. George keeps his eye on Lennie all the time, sort of like a father figure. Every time they get in trouble they run from it, trying to look for more work. However, one day Lennie gets them into a circumstance George can't get them out of. George has to decide what to do.
