REVIEW OF DELL 1355CN SERVICE MANUAL

- I am a running coach and had heard all the hype about this book so I felt compelled to buy it. At the end of the day, the

information was not nearly as useful or revolutionary as the hype suggests. What it is, is merely a copy cat of "Pose running" with Ti-Chi attached. Now I don't have a problem with Ti-Chi, I just think it was the "juice" to sensationalize a system of running that is already in play. Well written, not much to argue with, I just was hoping for a bit more unique factor from the author which I did not find.

- I bought this book to improve my running form and especially my pace. This book introduces a person to being aware of your body mechanics while running. To me, many of the tips were common sense, such as keeping a straight posture and not swinging my arms wildly or crossing them in front of me. I probably wasn't leaning forward as much as I am now. I probably had more of an up and down stride, so that tip was helpful (although I'm still not any faster). The one tip that "did me in" was the tip to land mid-foot. I had always read and learned to land heel to toe. After about 2 months of landing mid-foot, I was puzzled and frustrated as to why I started to have extremely painful knees. Especially walking up and down stairs. I couldn't figure out why this was happening. It got to the point where I dreaded my run and every step I was saying ouch, ouch, ouch. Then I thought, I think I'll stride the way I used to stride and within 1 day the pain was gone. I am now back to a heel toe landing and wanted to warn other people who have read this book. I'm not saying the advice in the book is all bad, but you also need to listen to your own unique body.
