 Jackaroo; n. a male station hand. That is according to the "Australian Slang Dictionary" whereas the Macquarie Dictionary gives a more realistic version. "A jack of all trades". Certainly a jackaroo is far more than 'a male station hand', which will be evident as the reader moves through this recount of the writer's five years of 'Station Management Apprenticeship"', possibly a more precise definition of the word. ('Station' being a large sheep and/or cattle property/ranch). The origin of the word 'jackaroo' has been debated as long as the word has been in existence, but the most popular belief is that early English migrants, who worked on stations in the Australian Outback, were given the name of "Jack Raw", being raw to the ways of the Australian bush. One such English migrant, whose name was Jack Carew may have had an influence on the foundation of the word. There is also the more recent female counterpart, known as a jillaroo. It is however, generally agreed that the word has no connection with the famed Australian icon, the kangaroo.

This text covers the basic facts and interpretation of microscopic anatomy. It emphasizes the relationship and concepts by which cell and tissue structure are inextricably linked with their function. Numerous photomicrographs and electron micrographs should amplify the text and remind the user of the laboratory basis of the study of histology. An atlas section containing 105 color plates is also included. Emphasis on diagrams, illustrations, and charts that summarize morphologic and functional features of cells, tissues, and organs, and inclusion of clinical correlations in each chapter to further illustrate the direct application of basic histological information to diagnosis, prognosis, pathobiology, and clinical aspects of disease, should appeal to students, who are anxious to see how the basic sciences taught in the first two years of medical school relate to the clinical aspects thereafter.

Catalyst Deactivation 1994 was an expansion of earlier, highly successful symposia. The objective of the symposium was to promote a scientific approach of the phenomenon of catalyst deactivation which will contribute to the development of catalysts which are less subject to structural transformations and more resistant to poisons and coke formation. These aspects are dealt with in 12 plenary lectures, 48 oral presentations and 35 poster papers, which were critically selected from an impressive response from some 30 countries. Both fundamental and applied aspects were covered. The deactivation of catalysts in important industrial processes like fluid bed catalytic cracking, hydrotreatment, hydrodesulfurization, catalytic reforming, hydrodenitrogenation, steam reforming, hydrodemetallization, hydrocracking, Fischer-Tropsch synthesis, propane dehydrogenation, phthalic anhydride synthesis received considerable attention. Mechanisms of poisoning, sintering and coking were further investigated and modelled and new experimental techniques for the characterization and the quantification of deactivation were also introduced.

“The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and protection of intelligence in your business. J. C. Carleson’s presentation of years of spy tradecraft will make you a more effective force within your organization.”  
—James Childers, CEO, ASG Global, Inc. When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn’t expect was that the skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies—not only how to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carleson explains how working like a spy can teach you the principles of: Targeting—figuring out who you need to know and how to get to them Elicitation—a subtle way to get the answers you need without even asking a question Counterintelligence—how to determine if your organization is unwittingly leaking information Screening—CIA recruiters’ methods for finding and hiring the right people The methods developed by the CIA are all about getting what you want from other people. In a business context,

these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, "In a world where information has a price, it pays to be vigilant." Her book will show you how.

## **REVIEW OF ISUZU TROOPER OWNERS MANUAL**

- The author or authoress who can evoke such emotion in their

narrative as to have the reader laugh out loud or weep has succeeded in the art of writing, and Mr Vance in this delightful book has achieved this goal. He writes about family, hunting friends, and gundogs but also, and with great respect, the object of his hunting obsession; the Bobwhite quail. Not only is this book a chronology of one man's life and passion, but Mr Vance also shares with the reader his knowledge of gundog husbandry and training, some fabulous quail recipes, recommendations of

appropriate hunting apparel, field shotguns and lots more. Indeed, his writings on the age old complexity of eye dominance for the shotgun user is the most concise I have ever read. As a Brittany owner I found this book especially joyful in that the author really does know the breed...the wonderful little French hunting dog to whom the author refers to as God's Bird Dog.

- all stories are great. the stories pertaining to family are my favorite.
