He's back from the dead, on a new mission...because two can play her game! After two years as a POW presumed dead, SAS soldier Lee Davis is finally going home. Back to his family, friends and...fiancée? He doesn't have a fiancée...the night before his last deployment, Juliet Browne rejected his proposal. That makes the sight of her playing the grieving almost-wife beyond infuriating. Feigning amnesia, Lee decides to put Juliet's "commitment" to the test. Yet tormenting her conscience isn't as easy as Lee thought it would be. Juliet's still the woman whose memory got him through the worst of his captivity and her actions now prove she cares—a lot. And despite her betrayal, he needs her more than ever. Because Lee is beginning to realize that for him, Juliet is home.

Vilified as the great failure of all London Transport bus classes, the DMS family of Daimler Fleetline was more like an unlucky victim of straitened times. Desperate to match staff shortages with falling demand for its services during the late 1960s, London Transport was just one organization to see nationwide possibilities and savings in legislation that was about to permit double-deck one-man-operation and partially fund purpose-built vehicles. However, prohibited by circumstances from developing its own rear-engined Routemaster (FRM) concept, LT instituted comparative trials between contemporary Leyland Atlanteans and Daimler Fleetlines. The latter came out on top, and massive orders followed. The first DMSs entering service on 2 January 1971. In service, however, problems quickly manifested. Sophisticated safety features served only to burn out gearboxes and gulp fuel. The passengers, meanwhile, did not appreciate being funnelled through the DMS's recalcitrant automatic fare-collection machinery only to have to stand for lack of seating. Boarding speeds thus slowed to a crawl, to the extent that the savings made by laying off conductors had to be negated by adding more DMSs to converted routes! Second thoughts caused the ongoing order to be amended to include crew-operated Fleetlines (DMs), noise concerns prompted the development of the B20 "quiet bus" variety, and brave attempts were made to fit the buses into the time-honored system of overhauling at Aldenham Works, but finally the problems proved too much. After enormous expenditure, the first DMSs began to be withdrawn before the final RTs came out of service, and between 1979 and 1983 all but the B20s were sold — as is widely known, the DMSs proved perfectly adequate with provincial operators once their London features had been removed. OPO was to become fashionable again in the 1980s as the politicians turned on London Transport itself, breaking it into pieces in order to sell it off. Not only did the B20 DMSs survive to something approaching a normal lifespan, but the new cheap operators awakening with the onset of tendering made use of the type to undercut LT, and it was not until 1993 that the last DMS operated.

After 1945 many countries needed new vehicles in order to replace those that had been destroyed or worn out in the war and so British factories were offered incentives to produce and export lorries. Foden were one such company to take advantage of the opportunities available and in the 1950s, had agents in almost every West European country. In the 1970s when the European market had declined, the Middle East, Australia and South Africa markets rose to prominence and from the 1980s onwards, New Zealand became the primary destination for the marque. By the time production finally ceased in 2006, they had sold vehicles all over the world. The vehicles produced for export differed greatly from the designs used in Britain. In many countries the gross weights of vehicles exceeded the British values significantly, so the majority of Foden export vehicles had much stronger chassis, gearboxes, axles, suspensions and more powerful engines than their British counterparts. Many also had tropical double roofs to keep the heat out and sleeper cabs, long before they became common in the UK. This comprehensive book detailing the lorries that Foden exported around the world, follows on from the publication of the author's first book about the Fodens produced and used within the UK (Foden Special Vehicles). It includes 364 fascinating photographs, many of which have never been previously published and will be of interest to all Foden fans and transport enthusiasts in general.

Every year on the first Sunday in August, hundreds gather to see one of the greatest displays of historic commercial vehicles. First organised in 1969, the Trans Pennine Run attracts an annual entry of around 200 vehicles coming from all over the UK. The event starts at Birch Services on the M62 at Manchester at about 7.30 in the morning and runs for 64 miles via Rochdale, Halifax and Bradford, taking in some of the finest Yorkshire scenery along the way. From 11.30 the vehicles start arriving at the famous Harrogate Stray where they are then displayed to the public. Avid photographer, Roy Dodsworth has been following the event since the late 1990s and has a collection of over 3000 images taken there. This book collects together 262 of Roy's favourite truck photos, including a bit of history about each of the vehicles - many of which have been restored to their original livery. The Trucks of the Trans Pennine Run is a must-have for any driver who has ever participated in the run. Current and former truckers and anyone else with an interest in transport history will all enjoy being reminded of these beautiful old vehicles.

Leyland's Big Cat Coaches Veloce Publishing Ltd

The increasing cost and scarcity of durable boatbuilding timbers have affected the construction of fishing craft around the world. The developed world has by and large witnessed the transfer from traditional wooden boatbuilding methods to either less conventional wood construction techniques (e.g., plywood or wood laminates) or non-wood materials such as fibre reinforced plastic (FRP), steel, aluminium and ferrocement. These techniques generally favour less labour intensive methods of construction. In the developing world where timber is still the predominant boatbuilding material, the scarcity and high cost of good quality timber have not meant that less wooden boats are being built, but rather that building quality has deteriorated through the use of poor quality timber. At the same time, however, attempts have been made to diversify construction methods with varying degrees of success. This publication is intended to benefit those who are considering ferrocement construction; it is assumed that those who use the book are already conversant in small fishing vessel construction.

Diesel Engineering Butterworth-Heinemann

Dissatisfied with the reliability of its AEC Merlin and Swift single-deck buses, London Transport in 1973 purchased six Leyland Nationals for evaluation. Liking what it saw of this ultimate standard product, where even the paint swatch was of Leyland's choice, LT took up an option to buy fifty more from a canceled export order and then bought further batches of 110, 30 and 140 to bring the LS class to 437 members by the middle of 1980. A year later the last MBAs and SMSs were replaced on Red Arrow services by sixty-nine new Leyland National 2s. Straightforward but reliable, the LS satisfied London Transport's single-deck needs for a decade and a half, often standing in for double-deckers when needed, and then going on to help hold the fort during the tough years of early tendering, during which some innovative LS operations introduced several new liveries and identities. The type served the ten years expected out of it with few worries, only starting to disappear when minibuses came on strength at the end of the 1980s. Although the LS was formally retired by 1992, refurbishment programs gave survivors an extended lease of life, bringing us the National Greenway, the ultimate development of the Leyland National. Most of the Red Arrow National 2s thus became GLSs, and lasted until 2002. Matthew Wharmby is an author, photographer and editor specializing in London bus history. His published books include London Transport's Last Buses: Leyland Olympians L 1-263, Routemaster Requiem and Routemaster Retrospective (with Geoff Rixon), London Transport 1970-1984 (with R. C. Riley), The London Titan and The London Metrobus. He has also written many articles for Buses, Bus & Coach Preservation, Classic Bus and London Bus Magazine.

In general, publication reviews have a substantial impact on the literary globe and are critical for both readers and sector specialists. By sharing our thoughts and recommendations, we can help to shape the future of the posting industry and support our preferred writers.

REVIEW OF LEYLAND 680 ENGINE

- Fed up with the rule of Ankh-Morpork's Patrician, Edward D'Eath searches for the True King. After extensive reaserch into the city records, he finds this to be Corpral Carrot of Ankh-Morpork's City Watch. Unable, however to persuade the Nobility that a king is what the city really needs, he learns of a weapon so fearsome that it has been kept under lock and key for years. Using this weapon, Edward decides to stir up so much trouble in the city that its citizens will revolt and force the king on the throne. And as usual it is up to the watch to stop this madman....

- I wanted to read this book because of the title. It really intrigued me. But during reading I could not find any solitude. Life of people in Macondo was overfilled by lonless, but everyones life is like that. The only character I like is Jose Arcadio Buendia because his way of isolation was very comical. It was funny when he sat over the tree and did exactly nothing. I enjoy making the gold fishes by his son, too. The end took by surprise on me. However, my feelings after reading was not very fast and I felt like did not get that, what I had expected. I think it needs a few rereading to understand it.
