## **REVIEW OF MY TRIP TO BALI A TRAVEL JOURNAL AND DAIRY FOR KIDS**

- There are so many quilt blocks to choose from. None of the block patterns are in color, but it will still be easy to choose appropriate fabrics to use. Each of the black and white block designs are illustrated very well in great detail utilizing various textures of shading to represent the types of fabrics used. The

wide variety of dark and light contrasting designs in each block effectively indicate a vast assortment of fabrics such as prints, florals, checks, stripes, solids, dots, and so many more. In fact, these black and white illustrations might actually make it easier to choose fabrics to use, because they are so straight forward and distinct.

- Why do buildings and bridges suddenly collapse, or why do airplanes fall out of the sky? Even though since the start of the industrial revolution the relative number of disastrous accidents has gone down, it is still a daily event. Some great examples are given (most prominently the walkway of a Houston hotel that collapsed during the opening ceremony) with pictures and detailed analysis. Great stuff even for non civil-engineers since with some imagination you may learn some more general design lessons. The editorial side of the book is less impressive, most facts and interpretations are repeated 3 or 4 times throughout the book (excluding the introduction and back flap) so I never got further than 3 quarters into it, preventing myself from another déjà vu. In any way, a very important and useful read.
