- i am doing Ph.D. in molecular biology and this book is very useful in the cloning and genetic engineering portion. i read this book from the library. it is the bible of genetic engineering and great text book for the subject.it gives a comprehensive study with minute details and recent advances. overall worth purchasing.

- Of all the reference books I have on fluorescence spectroscopy, Dr. Lakowicz's book is the most comprehensive. It is a masterpiece. His book covers many aspects of fluorescent biological systems but it also treats inorganic systems. The foundations of fluorescence and fluorescence spectroscopy are quite comprehensive and very well covered. This is an excellent text and reference book for any person involved not only in bio-related research, but in any discipline involving fluorescence.
