Introduce the latest version of the fundamental SQL language used in all relational databases today with Casteel's

ORACLE 12C: SQL, 3E. Much more than a study guide, this edition helps those who have only a basic knowledge of databases master the latest SQL and Oracle concepts and techniques. Learners gain a strong understanding of how to use Oracle 12c SQL most effectively as they prepare for the first exam in the Oracle Database Administrator or Oracle Developer Certification Exam paths. This edition initially focuses on creating database objects, including tables, constraints, indexes, sequences, and more. The author then explores data query techniques, such as row filtering, joins, single-row functions, aggregate functions, subqueries, and views, as well as advanced query topics. ORACLE 12C: SQL, 3E introduces the latest features and enhancements in 12c, from enhanced data types and invisible columns to new CROSS and OUTER APPLY methods for joins. To help readers transition to further studies, appendixes introduce SQL tuning, compare Oracle's SQL syntax with other databases, and overview Oracle connection interface tools: SQL Developer and SQL Plus. Readers can trust ORACLE 12C: SQL, 3E to provide the knowledge for Oracle certification testing and the solid foundation for pursuing a career as a successful database administrator or developer. The SQL database language is the foundation of all relational database activities. This training Oracle 11g course is intended to provide an introduction to SQL within the context of

an Oracle database. Since the language is an industry standard, much of the course contents are also applicable to other databases, such as MS SQL Server, IBM DB2, MySQL, PostgreSQL, and others. This guide takes a unique approach to learning the language, in that it combines the data modeling theory, graphical illustrations of the logical concepts and many examples of actual syntax to help one truly grasp the power of the SQL language. Among the specific topics we will explore are: - A summation of relational database principles and an introduction to the Oracle relational database server;- Using SQL Developer and other available SQL interfaces to the database;- Writing simple SQL queries which isolate exactly the data desired, and then format and sort the query results as needed;- Writing moderately complex SQL queries using various join techniques;- Supplement SQL code with references to pseudo columns and built-in system functions;- Summarizing, grouping and combining data to obtain more meaningful query results and to allow one to draw conclusions and make business decisions based upon the data processed;- Advanced query techniques such as set operations, sub-queries and summary functions, allowing one to solve some of the more complex theoretical query challenges; - Creating and maintaining database tables using the SQL Data Definition Language (DDL); - Managing data within tables using the SQL Data Manipulation Language (DML); - Taking advantage of the latest features found within the database such as the use of regular expressions, support for international data, time zones and other topics.

• As a fan of Doc Savage, I consider myself fortunate to have collected all of the Bantam Paperback reprints of the original 181 Doc Savage Magazines. Written by Lester Dent, under the pen name of Kenneth Robeson, the pulp magazine was published as a monthly beginning in 1933 to 1949. (For the last few years it was a quarterly.) In 1964, Bantam began their series of paperbacks, which ran for 26 years. As time allows, I will give brief descriptions/reviews of the entire series. "The Land of Terror," number 8 in the series, hit the magazine racks one month after the world premier of the original "King Kong" movie. And, because of the tremendous popularity of that film, I don't believe that there is any coincidence that "The Land of Terror" is inhabited by the same creatures that were found on Skull Island: dinosaurs of all shapes and sizes. Following the trail of an evil scientist who has discovered an element that creates a vile greenish vapor that can make anything evaporate into thin air, Doc and his gang leave New York to follow a trail of death to Thunder

Island in the south Pacific. The Island is actually an active volcano, and Doc and his crew fly into the crater where they are attacked by flying pterodactyls who tear apart their plane forcing the men to parachute deep into the volcano where vicious killing beasts of old surround them and engage in massive battles, just like in "Kong." Like Skull Island, they have found a land that time and evolution has passed by. This book is packed with excitement as first one and then another of the adventurers faces seemingly impossible odds. It's another red-blooded tale in the Savage catalogue, and one not to be missed. Finally, in every Doc Savage book, Robeson includes a line that's almost poetic in its beauty. Finding it is like looking for "Nan" in a Hershfeld caricature. From "The Land of Terror" comes: "A black ghost of a night seemed to have sucked the city into its maw. There was fog, like the clammy breath of that night ghost. Out on the bay, a night owl ferry to Staten Island hooted disconsolately at some fancied obstruction in its path." How's that for pulp fiction?
