It also aims to support the development of practice. It is a useful book for those involved in educational management and for policy makers at all levels' - ESCalate 'The authors challenge the reader to reconsider leadership theory in light of notions of social justice and diversity, and to put into place newly articulated frameworks for action...The text is richly supported by strong empirical research and a sometimes-intricate philosophical approach in making its case for justice and fairness in education and beyond' - Choice Magazine What do we mean by diversity? Why is it an important issue for leaders of schools, colleges and universities? As society becomes increasingly diverse, there is significant international awareness in education about how this impacts on leaders and leadership. For decades the emphasis has been placed on increasing the number of leaders with specific attributes, such as women or those from ethnic minorities, to encourage a true representation of society. This far-reaching book takes a wider view, challenging the reader to recognise the importance of diversity issues and to embed diversity as central within leadership theory and practice. Drawing on their extensive research the authors establish a clear understanding of what diversity means and use this to develop a distinct approach to conceiving leadership, preparing leaders and acting as leaders. They explain how diversity should be a holistic issue which touches every aspect of leadership and is vital to ensuring

effective and appropriate leadership for education in pluralist societies. The authors explore the history of approaches to addressing inequities in access to leadership positions and the experience of leadership, from equal opportunities, to diversity and inclusion, to capabilities approaches. The book also proposes fundamental and concrete changes that leaders can undertake both in their own and their organisation's practice, to reflect a real commitment to social justice in a diverse society.

Think Again Routledge

The critics who despair of the coming of imaginative, charismatic leaders to replace the so-called manipulative caretakers of American corporations don't tell us much about what leadership actually is, or, for that matter, what management is either. Now, John P. Kotter, who focused on why we have a leadership crisis in The Leadership Factor shows here, with compelling evidence, what leadership really means today, why it is rarely associated with larger-than-life charismatics, precisely how it is different from management, and yet why both good leadership and management are essential for business success, especially for complex organizations operating in changing environments. Leadership, Kotter clearly demonstrates, is for the most part not a god-like figure transforming subordinates into superhumans, but is in fact a process that creates change -- a process which

often involves hundreds or even thousands of "little acts of leadership" orchestrated by people who have the profound insight to realize this. Building on his landmark study of 15 successful general managers, Kotter presents detailed accounts of how senior and middle managers in major corporations, in close concert with colleagues and subordinates, were able to create a leadership process that put into action hundreds of commonsense ideas and procedures that, in combination with competent management, produced extraordinary results. This leadership turned NCR from a loser to a big winner in automated teller machines, despite intense competition from IBM. The same process at American Express and SAS helped businesses grow dramatically despite the fact that they were "mature" and "commodity-like." Kotter also shows how leadership turned around operations at P&G and Kodak; produced huge business successes at PepsiCo, ARCO, and ConAgra; and made the impossible occasionally happen at Digital. Thousands of companies today are overmanaged and underled, John Kotter concludes, not because managers lack charisma, but because far too few executives have a clear understanding of what leadership is and what it can accomplish. Without such a vision, even the most capable people have great difficulty trying to lead effectively and to create the cultures which will help others to lead.

REVIEW OF NORTHOUSE LEADERSHIP THEORY AND PRACTICE 5TH EDITION

- In this wonderfully entertaining book, Steinbeck takes a road trip across America and back, exploring its geography, culture, religion and society. In the process he explores the very nature of travel, why so many of us are so drawn to it and how that affects our lives. Travels with Charley in Search of America is similar in some respects to Steinbeck's 1948 A Russian Journal, although here the writing is somewhat more about America than A Russian Journal was about Russia. This book is also very different in that here Steinbeck travels with his dog as his only companion, whereas A Russian Journal was about travels with Steinbeck's

close friend Robert Capa. This book is a very thought-provoking and entertaining exploration of many aspects of America. I highly recommend it.

- I enjoyed the first half of this memoir, but then lost interest after Montana. Steinbeck does have some spot-on observations. I especially liked his view on antiques. Recommended.
