- Context. Barsoom hit the big screen yesterday, the results of which I can't yet comment upon. However, I can say that months ago when the ads began to appear, it renewed my childhood curiosity of the Boris Vallejo and Frank Frazetta covered paperbacks. As an early teen, I dismissed these adventures, unread, as something that surely couldn't be worth a read. Not much has really changed between then and now, except maybe that the public domain copy of Princess was available for free download. My speculative and hesitant foray soon become one of an increasing, if guilty, pleasure. Having finished, I'm not embarrassed to report that I had a fantastic time on Mars with John Carter. This tale is one of limited organization and pure adventure. Think back to sitting in a tree-house with comic books, and exchanging with friends the speculations of aliens, monsters, war, etc. and the elaborate weavings in and out of logic that so captivated you then. Burroughs took me back to that place, and I greatly appreciated and needed the visit. Want to escape for a few hours, I think this is a good place to try. Want to engage in philosophical debate about Burroughs' place in the pantheon of great writers, sure, why not, this won't hurt. If you are a dedicated hater of fun and have no time for frivolity, look elsewhere... I'm giving this book four stars, because if you're considering buying it, you are probably not the type that looks down on this type of fiction and will enjoy it, or, even better, you're the type that reads everything with great intensity, and like me, are curious to see why something apparently so silly, has stood what appears to be, a test of time greater than most.
