Guide to Research Techniques in Neuroscience Independently Published

The Encyclopedia of Plant Physiology series has turned several times to the topic of photosynthesis. In the original series, two volumes edited by A. PIRSON and published in 1960 provided a broad overview of the entire field. Although the New Series has devoted three volumes to the same topic, the overall breadth of the coverage has had to be restricted to allow for greater in-depth treatment of three major areas of modern photosynthesis research: I. Photosynthetic Electron Transport and Photophosphorylation (Volume 5 edited by A. TREBST and M. AVRON, and published in 1977); II. Photosynthetic Carbon Metabolism and Related Processes (Volume 6 edited by M. GIBBS and E. LATZKO, and published in 1979); and III. Photosynthetic Membranes and Light-Harvesting Systems (this volume). As we approached the organization of the current volume, we chose a set of topics for coverage that would complement the earlier volumes, as well as provide updates of areas that have seen major advances in recent years. In addition, we wanted to emphasize the following changes in the study of photosynthetic systems which have become increasingly important since 1977: the trend toward increased integration of biochemical and biophysical approaches to study photosynthetic membranes and light-harvesting systems, and a renewed appreciation of the structural parameters of membrane organization.

The concept of the 3Rs (Refinement, Reduction and Replacement) has been used as a framework for improving the welfare of laboratory animals for the last half century. By establishing an animal-centric view on housing and management, Animal-centric Care and Management: Enhancing Refinement in Biomedical Research takes Russell and Burch's definition of Refinement as "elimination of inhumanities" and goes further. Rather than fitting animals into experimental conditions, it encourages readers to adjust conditions to better meet the behavioral, emotional, physical, and physiological needs and preferences of the animals. The team of expert authors, from the fields of laboratory animal science, ethology, biology as well as animal training, provide ideas for creating housing conditions and handling procedures that induce, to the best of current abilities and knowledge, a long-term positive state of mind in the animals under our care. This book is written for animal caretakers, animal health technicians, researchers, animal facility managers, laboratory animal veterinarians, and anyone who engages in work with living experimental animals or is interested in the continuous improvement of laboratory animal welfare. This interdisciplinary guide will act as a catalyst, resulting in multiple

REVIEW OF ANIMAL PHYSIOLOGY STUDY GUIDE

- When I began *The Giver* there was a sense of longing. A world where there is no crime, hate, or fear sounds perfect. It describes utopia, 'a place of ideal perfection especially in laws, government, and social conditions'. It is very similar to Sir Thomas More's book *Utopia*. And like *Utopia*, there are many contradictions in this world. The community's purpose is to create uniformity throughout the society. This is seen in the indistinguishable clothing that is worn, the elimination of material

possessions, and the identical family units consisting of a male and female parent and a son and daughter."Almost every citizen in the community had dark eyes. But there were a few exceptions. Jonas himself, and a female Five who he had noticed the different, lighter eyes. No one mentioned such things; it was not a rule, but was considered rude to call attention to things that were unsettling or different about individuals."(p. Lowry 20)Using the word individual in this quote contradicts the message it is trying to convey because the goal of this community is to eradicate any form of uniqueness.In a Utopian society everybody's work is considered equal and important. Yet the book includes undertones, which uncovers hierarchy within jobs. When Lily confesses her desire to 'get assigned to be a birthmother' she is immediately chastised and is told "There's very little honor in that Assignment."(Lowry. p21) This alone shows the societies unfavorable stance towards life when a job

that is directly related to the giving of life is thought of as inferior.Overall Lowry's Utopian society exemplifies a lack of trust in human nature. Decisions are left up to 'The Elders' therefore eliminating any free will.

- "The Giver" is Lois Lowry's masterpiece. A book every young reader should experience. The idea of a land without pain and disadvantages is a mind-thriving concept. This novel takes readers through the concept of reality that we don't often think about, and turn our attention to the question"what is the meaning of life?"
