Weird City Guilford

As long as the human species has existed, men and women have had to contend with the unpredictable forces of nature. Geographer Barry A. Vann brings a unique perspective to this age-old struggle in this illuminating overview of human population shifts and their precarious relationship with climate change and geography. Vann takes us on a journey along the migration routes of the earliest modern humans and tells why our ancestors chose to settle down in places that can be best described as natural utopias. In the religiously oriented worldview of ancient peoples, such places took on a sacred aura of divine favor. Similarly, destructive

events such as volcanic eruptions and earthquakes were interpreted as expressions of divine wrath. Vann shows how the ancient texts of the Bible and the Qur'an offer glimpses of past climates that were distinctly different from the climate of our time. He also discusses the rise of technology as a means of controlling the threatening features of the natural world. Though technology has enabled humanity to cope with hostile climates, it has also created a false sense of security. Vann notes that population clusters are increasing in dangerous areas and that no technology can protect vulnerable groups from major-category hurricanes, tornadoes, or

earthquakes. Finally, he considers our current anxieties regarding global warming, pointing out that this focus has obscured a good deal of historical and geological evidence for a return of another ice age. The Forces of Nature offers a challenging perspective on the precarious balance between fragile human communities and their often-threatening environments.

Traditionally the Acts of the Apostles has provided the framework for biographies of the Apostle Paul. In recent years, however, the historical value of the Acts has come into question. Many

scholars argue that, despite the accuracy of many details, the text as a whole reflects the interests of Luke rather than objective reality. This book presents a completely new, and much more vivid and dramatic, account of the life of Paul than any before. While continuing to give consideration to the Acts, Murphy-O'Connor reconstructs the apostle's life--from his childhood in Tarsus and his years as a student in Jerusalem, to the successes and failures of his ministry--from his own writings. Reinforcing his critical analysis of Paul's letters with close attention to archaeology and contemporary texts, Murphy-O'Connor not only charts Paul's movements, but

extracts a new understanding of his motives and the social and cultural aspects of his ministry. Most important of all, this biography transforms a fountain of theological ideas into a human being.

The authors maintain that regions are the outcomes of a set of twin forces of globalization and regionalization. Therefore, each regional chapter stresses the global systems of connection that drive unique regional processes, making regions different. By studying regions, students not only learn the critical elements of different places, but also come

to understand the fundamental processes that drive change. The Fifth Edition discusses geographies of emerging regions, incorporates cutting-edge data visualizations and infographics, including Quick Response codes linking to online media, features a completely modernized cartography program, and much more.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-

half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist

groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Paul: A Critical Life
Prentice Hall

Austin, Texas, at the beginning of the twenty-first century, is experiencing one of the most dynamic periods in its history. Wedged between homogenizing growth and a long tradition of rebellious nonconformity, many Austinites feel that they are in the midst of a battle for the city's soul. From this struggle, a movement has emerged as a form of resistance to the rapid urban transformation brought

about in recent years: "Keep Austin Weird" originated in 2000 as a grassroots expression of place attachment and anti-commercialization. Its popularity has led to its use as a rallying cry for local business, as a rhetorical tool by city governance, and now as the unofficial civic motto for a city experiencing rapid growth and transformation. By using "Keep Austin Weird" as a central focus, Joshua Long explores the links between sense of place, consumption patterns, sustainable development, and urban politics in Austin. Research on this phenomenon considers the strong influence of the "Creative Class" thesis on Smart Growth strategies,

gentrification, income inequality, and social polarization made popular by the works of Richard Florida. This study is highly applicable to several emerging "Creative Cities," but holds special significance for the city considered the greatest creative success story, Austin.

The Gospel According to Matthew Canongate U.S.

How can a just peace be built in sites of genocide, massive civil war, dictatorship, terrorism, and poverty? In *Strategies of Peace*, the first volume in the *Studies in Strategic Peacebuilding* series, fifteen leading scholars propose an imaginative and provocative approach to peacebuilding. Today the dominant thinking is the "liberal peace," which stresses cease fires, elections, and short run peace operations carried out by international institutions, western states, and local political elites. But the liberal peace is not enough, the authors argue. A just and sustainable peace requires a far more

holistic vision that links together activities, actors, and institutions at all levels. By exploring innovative models for building lasting peace—a United Nations counter-terrorism policy that also promotes good governance; coordination of the international prosecution of war criminals with local efforts to settle civil wars; increasing the involvement of religious leaders, who have a unique ability to elicit peace settlements; and many others—the authors advance a bold new vision for peacebuilding.

Additionally, there were some loosened ends that were not locked up by the end of guide, which left us with unanswered concerns.

Sophie's World Farrar, Straus and Giroux

This compact and accessible text provides a comprehensive, issue-oriented introduction to population geography. First grounding students in the fundamentals, Bruce Newbold then explains the tools and

techniques commonly used to describe and understand population concepts using real-world issues and events. Drawing on both U.S. and international cases, he explores such pressing concerns as HIV/AIDS, international migration, refugee movements, fertility, mortality, resource scarcity, and conflict. Every chapter includes both methods and focus sections to provide a more in-depth discussion of the ideas and concepts developed in the book. In addition, a wide array of maps, tables, and figures illustrate and enhance the cases. Newbold highlights the geographical perspective—with its ability to provide powerful insights and bridge disparate

issues—by emphasizing the roles of space and place, location, regional differences, and diffusion. Arguing that an understanding of population is essential to prepare for the future, this cogent text will provide upper-division undergraduates with a thorough grasp of the field.

Strategies of Peace

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31)

the go-to element for laboratory pranksters?*

The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. **THE DISAPPEARING SPOON** masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch

guests recoil as their utensils disappear.

Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in

the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

REVIEW OF PAUL KNOX HUMAN GEOGRAPHY

4TH EDITION

• We'll start with the obvious. Richard Sharpe has no business being at the battle of Trafalgar. Despite this, Bernard Cornwell gives us an interesting and plausible story to get him there. It's still a bit contrived, but you'll forget all about it because the richness of the storytelling will have you feeling the deck swaying under your feet and you smelling the gunpowder in the air. I find this to be the most immersive Sharpe novel yet. There is a significant amount of the novel dedicated to the actual engagement at Trafalgar as you would expect from a Sharpe. It is terrifically paced and remarkably well explained at the same time. No mean

feat. The movements of the vessels and the ebb and flow of the battle are easily understood. It's probably the best description of a battle I have ever read, including textbooks on the subject. Objectively I should only give the book 4 stars because Trafalgar is not where Richard Sharpe belongs. As reviews are subjective, I'm giving it a 5 because it's brilliantly written and I'm a big softy so I really enjoyed the love story within this one.

• "The Rocksburg Railroad Murders" is the first volume in the series Mario Balzic series of K. C. Constantine. Balzic is described as "a hokey, untypical detective who works from a bedrock of compassion and shrewd common

sense." But do not let this bit of endpiece hyperbole dissuade you from checking out this mystery. Yes, there are some stereotypical elements in this novel--the chief hates the pompous district attorney Milt Weigh and the overly inquisitive reporter Dick Deitz, but this is also a chief of police who does not like his cops running around with guns (thing "Destry"). Mario has teenager daughters who are trying to tolerate his eccentricities, an elderly mother who remembers basically everything anybody has ever done in this town, and is friends with Father Marazzo, who is willing to listen to anything the chief wants to get off his chest. A man Mario has known since childhood is found bludgeoned to death with a Coke bottle on the platform of the Rocksborg railroad station. The damage is so bad Mario has to be told the name of the victim. From his initial investigation Mario becomes convinced that the man's stepson is the guilty party, but proving it is going to prove rather difficult for a lot of reasons. As the title indicates, this is only the first murder in the book and the tension builds as we wait for the second victim to drop. For Constantine's characterization assumes more of an importance than the detective work in this novel, because Mario pays as much attention to the need for compassion as he does

for the search for clues. This is a nice start. We get a good sense of the lay of the land, not only of Rocksburg but more importantly of the way Mario Balzic thinks and the way he feels. For me, this was enough to motivate me to move directly to the next story in the series, "The Man Who Like to Look at Himself." Except for the Spenser for Hire series I have never really a lot of mysteries per se, and when I do it is character more than story that grabs my interest. Warning: Constantine does not divide his novles into chapters, so if you settle down to read this book intending to finish the first chapter before you go to sleep, you are going to by up all night."The Blank

Page," the third novel in the series, begins when Chief Balzic receives a phone call from Miss Cynthia Summers who reports that she has not seen one of her student roomers for several days. Paying a courtesy call sounds a lot better to Balzic than working on the budget report until he finds the body of Janet Pisula on the floor of her room. The young woman has been strangled with her brassiere, wearing only her panties, with a blank sheet of paper resting on top of her body. The murder had happened sometime the previous week and nobody in the rooming house or on campus had noticed Janet had suddenly disappeared. By this point Constantine has clearly settled on a

specific literary modus operandi. Lt. Harry Minyon, the blundering blowhard who was in charge of the local State Police barracks in the previous mystery "The Man Who Like to Look at Himself" has been temporarily replaced by Lt. Walker Johnson, who is more in the mold of Lt. Phil Moyer from "The Rocksburg Railroad Murders" in terms of providing support for Balzic rather than a constant impediment in the search for the murderer. By removing the set of stereotypical clowns getting in the way of Balzic's investigation, Constantine is able to keep the story's focus on the chief's interrogative skills. In the current dichotomy represented by television's "Law &

Order" and "C.S.I." franchises, Constantine's Balzic is clearly in the camp of the former. The focus here is not on forensic science or the ability to beat and/or shoot up bad guys, but rather on asking the right questions in order to gather the necessary information. Reading these books is waiting for the key piece of the puzzle to show up so that everything can fall into place, at which point Balzic can go bring in the murderer. These novels are not so much about police procedure as they are the lost art of interrogation. Of course, in Constantine's hands these interrogations rarely take place in a special room at the police station. "The Blank Page" is the best

of the first three Mario Balzic novels, although readers who are captivated by some of the more colorful characters in Rocksburg may well wish Father Mazzo and Mo Vulcanas were more involved in the story as they were respectively in the first two books. Personally, I would like to see a bit more of Balzic's family, since they tend to provide nice counterpoints to the crime being investigated. But the most important other character in these novels to this point in the series clearly ends up being the murderer. I would not go so far as to say Balzic shows compassion for the murderers he catches (with the exception being what happened in the second novel), but there is certainly a strong sense of empathy and understanding towards the story they have to tell. But then, it is that ability to look at things from the perspective of others that is Balzic's greatest asset when it comes to solving crimes.
