REVIEW OF ALGEBRA FOR COLLEGE STUDENTS 5TH EDITION BY MARK DUGOPOLSKI PDF

- George Orwell published a book entitled 1984. The novel made a huge impact and made a statement about humanity. He wrote the book in 1949, envisioning the future of man. He believed that there would be dictatorship by the government by 1984. The novel's main character is Winston Smith. He doubts the system or the government, in which is Big Brother that's controls Oceania, one of the three super states. Winston is older than most citizens of the super state. He slightly remembers life before Big Brother. Big Brother would prefer people not to know the past. Though his memories are indistinct, he thinks that life must have been better before Big Brother's leadership. As Winston's rebellion progresses, he meets Julia, who is also against Big Brother. Winston and Julia become lovers and confess their rebelliousness to O'Brien, who is believed to be a member of a

rebel group called Brotherhood. Then comes the story's climax. The reader will be introduced to what's behind 1984. George Orwell brings suspense in the story when he shows us what is really behind Big Brother. Big Brother uses mental manipulation to influence its citizens. This book reminds us of political tragedies, how the government can control everything. George Orwell reminds us of what went wrong, what can go wrong, and what will go wrong when the government becomes all-powerful. I believe that this book opened my mind to politics. 1984 is one of the best books written. Orwell writes about reality and bases its contents to the real world.

- I found the O'Brien character in 1984 to be unrealistic. The idea of someone intelligent enough to run a sophisticated surveillance state acting against economic progress and enjoying ruling over people in the most brutal and barbaric way is not realistic. Compare this to Koestler's Darkness at Noon, in my opinion a far superior novel, where the state is run by violent but stupid brutes who would not be intelligent enough to run a sort of 1984 dystopia. However, this is still a great novel in that it accurately predicted the inevitable surveillance of everyone's lives that has been a reality, and is increasingly becoming more and more prevalent, with the surface justification being anti-terrorism. Winston, an isolated individual, can do nothing against the powerful bureaucracy and his attempt to oppose the state just leads to him being crushed. The imagery is the strongest part of the novel, with, for example the "10 minutes of hatred" and the "Ministry of Truth" propagated lies. It has become a part of our language, and both sides on the political spectrum lionize Orwell to demonstrate that the other side is immoral even while engaging in Orwellian language themselves in the same breath. However, Orwell, a miserable pessimist, like so many science fiction writers could see no solutions, and so 1984 has become a symbol of a future that must be opposed. He did not think of any possible solutions but only illustrated a future in which individuals were crushed by an omnipotent bureaucracy which only enjoyed crushing people. Orwell makes the bureaucracy one-dimensional, and as Dr. Dolan from the online newspaper the Exile points out, his choice of the name "O'Brien" demonstrates his particular form of British racism. Authors do not pick names randomly and Orwell was implying something without actually wanting to provide any details, because 1984 is on the whole a rant, but a very good rant that conjures up powerful imagery. If Orwell had created a more realistic portrayal of the future, even a more realistic dystopia, it may not have been as powerful in its effect on the reader. Since someone inevitably will make use of surveillance technology, either through the government, or if the government's powers were severely repressed, as libertarians believe is necessary to ensure progress and freedom, then through powerful corporations who bend the law and use their profits to surveil and manipulate the populace, and evade government attempts to stop them. Inevitably the power of surveillance will lie in someone's hands; it's just a matter of who. Thus the vast majority of individuals who simply view surveillance with superstitious hostility have not really thought about the issue much, and may simply have a desire to believe their lives are being controlled in the same way that many people, from environmentalists to religious zealots, pray for the end of the world. When this surveillance state uses its powers for its own selfish reasons and for the sheer thrill of power or when its tactics are unnecessarily brutal and disruptive, it must be opposed with every means necessary. However, if it allows legitimate free debate but only acts to disrupt organizations and movements that are nihilistically destructive, and people who seek to impose a 1984 dystopia upon us, then it may be a

source of good. However, it is proper that our natural reaction is to be skeptical, and blunders the CIA and FBI continuously make demonstrate that we cannot blindly accept that they are a progressive force. The fact that they allow their blunders to be revealed illustrates the unnecessary barbarity of some of their methods. The check on their power indeed comes from whistleblowers like Mike Levine, author of the bestselling expose of the CIA's involvement in the drug war (their interests were not in stopping people from using drugs) who point out their failures to discerning and curious individuals. If they go too far their will be a reaction against them and their power will be reduced, and individual agents purged. Thus it is important that those who wield the powers of surveillance realize that the most important reason why they possess these powers is to prevent less scrupulous individuals from using these powers to malign and destroy decent individuals. In 1984, the reporting of events was changed to represent the interest of Big Brother. Readers naturally and correctly find this concept scary, and the CIA and FBI have, at times, used such tactics themselves to unnecessarily destroy the lives of dissenting individuals when the tactics of debate should have been used rather than brute suppression if the whistleblower really did not have a full

understanding of the larger and correct motivations behind their tactics. If, like Lenin, they see the cautious use of force as a weakness rather than a symbol of superiority, then it does not matter what political party, ideology, or interests they serve; they have gone too far and must be routed out and attacked, not just by intellectuals like Chomsky made inconsequential by his incessant and one-sided rants, but by intelligent and brave individuals, whether liberal, conservative, or apolitical. Certainly there are times when force or using coercive tactics may be necessary, but the less such tactics are used the better. Non-interference, laying back and letting events take their course until just the right moment rather than sticking their finger in every pie, is the best option. Perhaps the key element is how they deal with exceptional individuals - scientists, literary figures, charismatic but intelligent politicians. If they only attempt to manipulate these individuals for their own end, controlling their every action, they may greatly reduce the good the individual could have produced. It is right that we, non-members of the Surveillance Party, skeptically try to deduce the influence spooks have on our lives and political events. It is also natural that the spooks try to keep their actions secret; that's who they are. When they use barbaric and destructive tactics it should be pointed out at every opportunity.
