REVIEW OF CONTINENTAL

MATH LEAGUE ANSWERS

- I found a bit of the information on guides in this book inaccurate or conflicting. However, the author seems to be more familiar in working with angels than guides and offers a great deal of useful and helpful exercises and techniques for connecting and building a stronger relationship between "worlds". I rated a 3 because I found the "working with guides" part of the book to be a bit misleading and didn't feel very much information was provided in that aspect. In "working with angels" there are many great detailed exercises, charts, and organized lists of angel names and hierarchies. Much of this information, namely the exercises can be slightly modified (if at all) to apply to

guides as well. Overall, a well written, easy to read book that is great for any beginner or anyone looking to learn more about angels.

- As a trained psychologist, Jeanette M. Gagan, writes lucidly about her own personal spiritual journey to wholeness through shamanic practice. By comparing apples (the shaman's fruit of choice) and oranges (the psychologist's fruit of choice), Dr. Gagan succeeds in answering the following questions: 1. How does the shamanic tradition bring such potent healing power to wounds incurred in the earliest months of life? and 2. Could journeying provide a release valve for the violence so rampant in our world? By contrasting the two traditions historically, Dr. Gagan, underscores the slices of each fruit that can be shared.

Central to finding common ground are the notions of altered states of consciousness, imagery, and the Jungian alchemical processes to healing. Throughout her story Dr. Gagan weaves in carefully chosen vignettes

from her clients' journeying, and explains how these experiences transcend verbal therapy and succeed in achieving transformation.--A very convincing and readable book.
