REVIEW OF CLINICAL ATLAS OF CANINE AND FELINE OPHTHALMIC DISEASE EBOOK

- This book is more of a research summary than a guide to helping your child. It is interesting and enlightening on the subject of research that has been done on kids social interaction, but its limited material on how to help your child is vague and not very convincing. It left me feeling that: yes, I recognized my daughter as a socially unsuccessful child, but I didn't know what to do about it. If you want an excellent how-to guide, try "Good Friends are Hard to Find" by Fred Frankel.
- I've been in the CRM industry for more than 10 years and have read nearly all of the books that exist on this topic. Barton Goldenberg's CRM Automation book is the best one on the market today. Unlike other CRM authors Barton Goldenberg has extensive CRM implementation experience and this is what differentiates his book from all the others. The guy has been in the trenches and he really knows what he is talking about! He shares his vast knowledge with the reader in a clear, concise way. No fluff, just valuable insight. Key points are driven home one after the other.
