REVIEW OF GLENCO WORLD HISTORY TEACHER EDITION ANSWER KEY

- Want to know how many errors I have found in this book? Let's just choose Chapter 9. (keep in mind I took the course.) I never took the test so I bought the book to brush up on BGP. The author hasn't ever used BGP, otherwise he would have known that the "set communities" command is used in the Router(config-route-map)# command mode and let you know how to configure it. One of the most important objectives 'Route maps' is scattered in other sections requiring it, but there is no chapter or section on how to create them?!? There is two lines of code on creating them. There are over 30 commands used in route maps that you have to know for the exam! Where are they? Both the "match"

and "set" commands, there are over 30 of them. The "show ip bgp neighbors" output was copied from the original 1.0 of the Cisco student guide. How do I know this? There were errors in the output that weren't fixed yet from the original Cisco student guide and missing two variables. They are the same two missing in the book. The configurations for the labs, if you apply them on a router, the syntaxes are backwards and won't work for a few of the commands. Not only that, there is 140 messages received and sent on the output. With the neighbors configured, the received messages would have been much higher than the sent. The output isn't real! This was a rush job on a book and the most important part is BGP. Someone who knew BGP should have wrote the chapter that covers 50 percent of the exam. I just looked at one chapter and realized all the mistakes. Not only that the commands don't show the syntaxes which you need to know for the exam.

- As a printer with a C & P platten press (1912 new series letterpress), I was having trouble locking up forms and getting good impressions. This book, Elementary Platen Presswork, really explained the process so I could do it correctly. It describes in basic terms the step-by-step process for all aspects of letterpress printing. For me, it explained in simple terms what I did not understand, and my printing is markedly improved with this classic book which was first published many years ago by Ralph W. Polk, an expert in teaching letterpress when it is a vocation, and not a avocation.
