The 1982 statistics on the use of family

planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth (NSFG), conducted by the National Center for Health Statistics. Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44. A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received. Statistics on family

planning services are limited to women who were able to conceive 3 years before the interview date. Overall, 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years. There were no statistically significant differences between white (79%), black (75%) or Hispanic (77%) wives, or between the 2 income groups. The 1982 survey questions were more comprehensive than those of earlier cycles of the survey. The annual rate of visits for family planning services in 1982 was 1077 visits /1000 women. Teenagers had the highest annual visit rate (1581/1000) of any age group for all sources of family planning services combined. Visit rates declined sharply with age from 1447 at ages 15-24 to 479

at ages 35-44. Similar declines with age also were found in the visit rates for white and black women separately. Nevertheless, the annual visit rate for black women (1334/1000) was significantly higher than that for white women (1033). The highest overall visit rate was for black women 15-19 years of age (1867/1000). Nearly 2/3 of all family planning visits were to private medical sources. Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources, as did black women age 15-24. White women age 20 and older had higher visit rates to private medical services than to clinics. Never married women had higher visit rates to clinics than currently or formerly married women. Data were also collected in 1982

on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term. About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview. During the 3 years before interview, about 1.9 million women had infertility visits. For all ever married women, as well as for white and black women separately, infertility services were more likely to be secured from private medical sources than from clinics. The survey design, reliability of the estimates and the terms used are explained in the technical notes.

This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly

the story behind this list, which appeared first as a few pages within the directory StarGuides (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary might be most often used.

Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS)* at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan,

with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 38 (thesis year 1993) a total

of 13,787 thesis titles from 22 Canadian and 164 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 38 reports theses submitted in 1993, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Cet ouvrage dresse un panorama complet des convertisseurs électroniques de puissance (DC/DC, DC/AC, AC/DC et AC/AC) utilisés classiquement dans les applications industrielles et de transport, plus

spécifiquement pour l'alimentation de machines électriques à vitesse variable. Dans une optique de conception et de dimensionnement, ce livre présente les différentes fonctions rencontrées en électronique de puissance de manière modulaire. Des thèmes moins classiques tels les convertisseurs matriciels et les convertisseurs multiniveaux sont traités. *Electronique de puissance pour l'industrie et les transports 2* propose également une étude de cas de conception d'un variateur industriel qui constitue une synthèse (à l'exception de la conversion AC/AC directe) des sujets étudiés, avec notamment le dimensionnement des composants passifs associés (comme les condensateurs de découplage du bus continu).

Addresses new developments in the design and fabrication of bipolar transistors for high-speed digital circuits. Covers advances in silicon technology (such as polysilicon emitters and self-aligned fabrication techniques), gallium arsenide technology (such as extremely

high-performance MSI circuits resulting from the development of GaAs/GaAlAs heterojunctions), and new applications of bipolar transistors (such as optoelectronic circuits). Also deals with optimization of bipolar devices and processes for high-speed, digital circuits by means of a quasi-analytical expression for the gate delay of an ECL logic gate. Includes case studies.

En développant depuis le début des années 1980 une instrumentation technique permettant de manipuler les atomes un à un et de contrôler les interactions de la matière à l'échelle nanométrique, les nanotechnologies ont rendu accessible à l'intervention humaine un monde aux propriétés multiples. On trouve aujourd'hui des nano-objets dans de nombreux produits de consommation courante notamment dans les industries cosmétique et alimentaire ainsi que dans la recherche médicale et l'électronique. Les programmes généreusement dotés de soutien public aux nanotechnologies ambitionnent de prendre en compte, sous la bannière de " l'innovation

responsable ", les enjeux sanitaires, environnementaux et éthiques de ce domaine émergent. Fort de ce constat, ce livre met en lumière les questions politiques portées par les nanotechnologies et ouvre des pistes pour le renouvellement du traitement démocratique de ces innovations scientifiques complexes.

La diversité des cultures, depuis la dispersion de par le monde des premières communautés de chasseurs-cueilleurs, a accompagné et largement

conditionné l'histoire de l'humanité. Il aura fallu des millénaires d'explorations et d'exactions, d'échanges violents ou pacifiques et deux révolutions technologiques pour atteindre la configuration actuelle, dans laquelle les cultures sont nécessairement confrontées les unes aux autres : mises au défi de se fondre dans une « mondialisation » envahissante, elles peuvent encore espérer la féconder sans s'y perdre. L'ouvrage s'inscrit dans le débat sur la préservation des cultures menacées. Le croisement de l'anthropologie et des SIC (sciences de l'information et de la communication) ouvre la perspective d'une approche critique de la mondialisation qui se souvient des sociétés disparues pour réfléchir aux grands enjeux de la période

actuelle. Car, si la rencontre des mondes est globalement enrichissante, en dépit des apparences, elle tend à appauvrir la diversité. Elle est extrêmement dynamique, mais va en s'accéléralant, entraînant une transformation sans précédent des modes de vie et des rapports de chacun aux autres. Ce livre, exempt de soumission aux idées reçues, éclaire de manière renouvelée et originale des problématiques centrales pour qui s'interroge sur les mutations du monde : l'atomisation des sujets et le lien que tissent les technologies de la communication en réseaux, les transformations du travail ou de la famille, le pillage des cultures, l'anomie, la progression du sentiment de solitude, mais aussi l'invention de nouvelles formes de sociabilité et de résistance...

REVIEW OF EVALUATION SUR LES TRANSISTORS

DOCUMENT SANS NOM

- A wonderful book with a wealth of material for the Heinlein scholar, critic, and collector...but its real contribution is to the serious Heinlein fan and reader (like me). Each time I re-read a Heinlein story, I flip open Gifford's book to see what he has to say about the story.
- Poor Tess! Life is hard from beginning to end for this poor girl. I kept hoping something would work out for her but alas it never did. Still a great read another Hardy classic I really enjoyed!
