### **REVIEW OF NERO 8 ULTRA EDITION REVIEW**

- David Moody's AUTUMN is brilliant. It's an unexpected journey that explores the emotional stability of survivors when faced with the realization that 99% of the population is dead. Left with only questions and an uncertain future, three survivors band together in search for some of life's basic needs and a futile effort to try to distance themselves from the lives they once knew. Although killed off by disease, the dead don't stay dead for long. At first they pose no threat; they're nothing but seemingly mindless bodies walking with no destination. Slowly, they regain some of their previous senses and begin posing a significant threat, if by nothing else than their sheer numbers. The dead take a back seat here, and in fact David never uses the word `Zombie' even once. Instead of violence, blood, and gore, we're given an incredibly realistic insight into the emotional side of what it would be like to survive such a significant life-changing event. Neurotic emotions, crazed ideas, and uncertainty are of the norm, making even simple tasks like going to the bathroom and boredom become things that can drive a person to the brink of insanity. Final Verdict: I once saw a bumper sticker that read: "The hardest part about a Zombie Apocalypse will be pretending I'm not excited." While I have to admit that running around blasting away at the undead with a sawed-off shotgun holds appeal, the reality of the situation would eventually sink in and put a squash to whatever short-lived thrill that provided. What's left would be the personal hell that David so availingly captures in his novel AUTUMN. Hands-down one of my favorite reads of 2010. DON'T MISS THIS ONE.

- I have recommended this small book to engineers and designers for over a decade, now. It is still timely, appropriate, and useful to the practitioner. This book is easy to read, even enjoyable. It gives a complete overview of what is important in writing a manual and how to organize it. Schoff and Robinson also give many good tips and techniques that you can use immediately in your documentation. I design real-time embedded products and have written a lot of documentation over 25 years. I appreciate what I have learned from Schoff and Robinson and have applied it for years.
