REVIEW OF ELECTRICAL ENGINEERING PRINCIPLES AND APPLICATIONS RAR

- Dairine Callahan is Nita (the wizard's) younger sister. When she sees how much fun Nita is having with the magic she naturally wants to join in too. But when her new wizard's manual turns out to be a computer and her powers are nearly limitless she is sent on an ordeal that will take her to different worlds, different galaxies and give her power that she never dreamed of. Nita and Kit come to the rescue but unfortunately the lone Power is not far behind them. And he realizes how powerful that Nita is too. He doesn't like it one bit. Though it's a step down from *Deep Wizardry* and so you want to be a wizard it's still entertaining. If you love the world of fantasy magic and wizardry this book is for you!

- I enjoyed this book. I like to learn about presidents. I like to know what people called the presidents. My favorite part of the book is when Andrew Jackson married Rachel Donelson Robards for the first time in 1791. I would think that people that who like presidents and want to learn about Andrew Jackson would like this book. I learned that in 1788 people would duel with other people. Sometimes they would be shot and die or they would be lucky and not be shot. Well I hope you read this book.
