REVIEW OF CORE WORKSHEET CHAPTER 11 THE EXPRESSED POWERS OF MONEY AND COMMERCE

• Screenwriting for Dummies provides comprehensive information about how to construct a screenplay, from concept to pitch, but its most valuable aspect is Schellhardt's coverage of film structure. She shows the bones of a good screenplay in a manner that doesn't seem so much formulaic as archetypal: a movie starts with its status quo, hits an inciting incident; its protagonist forms a plan of action at plot point one, hits the high or low of

his story at the midpoint, renews his efforts at plot point two, and earns his reward, or tragedy, in the conclusion. Schellhardt clued me in to the pattern, and now, when I sense a movie petering out or losing its focus, I have a notion why it happened. Schellhardt also covers outline writing in detail and takes a couple of pages to discuss the purpose and interleaving of subplot, as well as the usual stuff about formatting and marketing. This has not only become my favorite book on screenwriting, but has proven useful in my evolving understanding of plot in fiction.

- I first encountered this book in a class called -- wait for it ---the Economics of Organized crime. I was fascinated. The book explains the workings of

the Sicilian and New York Mafia as well as Asian Tongs and the drug trade. The chapter by Gambetta is especially interesting. The book does get a bit technical in places with formulas and such, but one can skip over that for the more general view of how organized crime and government are similar in their operations. This work gave me a lot of insight into the role that crime plays in our social and economic structures. This is also a nice introduction to Transaction Cost Economics, which is rather new in the field of Econ. I would only add that some background in Macroeconomics is useful for a fuller understanding of the book.
