Barron's Educational Series

The GRE Graduate Record Exam is changing substantially starting in August 2011, and Barron's is now ready with a thoroughly revised test prep manual that reflects the new exam's content. Although the GRE's Analytical Writing section remains essentially unchanged, new question types appear in both the GRE's Verbal Reasoning and

Quantitative Reasoning sections, and the model tests in Barron's brand-new 19th edition reflect these changes: Verbal Reasoning-- The verbal section now includes two new sentence completion types: sentence equivalence questions, for which test takers must identify two correct answers to receive credit; and text completion questions, some involving passages of several sentences and requiring test takers to fill in up to three blanks. Reading comprehension questions may now have more than one correct answer. Some reading questions will involve selecting individual sentences with passages. Quantitative Reasoning-- As in the

past, this section contains standard multiple-choice questions, as well as quantitative comparison questions. There are two new question types: multiple-choice questions that have more than one correct answer choice, each of which has to be selected, and numeric entry questions, which are the only questions on the test for which no answer choices are provided. Barron's new GRE manual offers intensive practice and review for all question types plus a diagnostic test and two full-length model GREs with answer keys and explanations for all questions answered. The authors also present a test overview and valuable chapters on test-taking tactics.

The manual comes with an enclosed CD-ROM offering model tests that closely reflect the computer-based test-taking conditions that students must be familiar with. The CD-ROM contains two full-length model tests in addition to those in the book. These computer-adaptive tests come with answers, explanations, and automatic scoring. REVIEW OF BARRONS NEW GRE WITH CD ROM 19TH EDITION BARRONS GRE WCD

- This book reads like a manual and was not as helpful or accessible as *Caged in Chaos* by Victoria Biggs.
- Without a doubt this has to be most boring, apocalyptic zombie horror book I have ever had the misfortune to read. The story starts off promising enough with an unknown virus which kills millions and nicely introduces us to

the characters but that's where it ends. The rest of the story is taken up with them finding somewhere to live and going out for supplies. The author does a good job of trying to convey the shock and disbelief of surviving such an event but it is overdone. 200 pages into a book I don't want the characters still sitting around in a state of shock. It seems as if David Moody started to write the first few chapters which evolved into a whole book but the early chapters never ended. At no point did I care about any of the characters because they were two-dimensional. We learnt very little of their back stories so I never connected with them. Now onto the zombies, OMG without doubt these are the most unscary monsters I have ever come across. They don't do anything but walk around and bump into things. It's obvious that the trio are never really in danger from them. I also find it hard to believe that in today's world, if you saw the dead rising and walking around the word zombie would not pop into your head, but it seems as if the protagonists in the book are oblivious to the fact that these dead people are indeed zombies. Save your money and buy World War Z.
