REVIEW OF BIOLOGY IMMUNE SYSTEM GUIDED

- I'm only 11, so my opinion may not count much, but this was a really good series! The story of a person going through so much and yet still surviving is one worth the effort (although it didn't take me long to read the series). Even if they were printed before I was born, it seems like an eternity for the next book to come out. What's the deal? Oh well, I'll comfort myself with the other

four.

- The Clan of the Cave Bear is very, very good. However, I only gave it four stars because it is a bit long-winded and its sentences run on. (It would have a long phrase, a comma, and then another long phrase. It got kind of tiring.) Ayla's abilities do not seem unnatural to me; Jean Auel did an excellent job of sculpting them into the story. Whoever said that Jean Auel "really, really wants to be blond" is sadly mistaken.
