REVIEW OF CHAPTER 11 CHEMISTRY REVIEW ANSWERS

- It's ok. You might want to try the casefiles series if you're trying to pick between them.
- This is a stunning book. It should be required reading for every medical professional. Doctors, nurses, and therapists, should have to read it twice, once in their first year of study and again before they graduate. I'm serious. And that is not to say that only medical professionals will benefit from reading this well-written book. Kathleen Bosworth tells her touching story from the lay person's point of view. From that first heart gripping moment when she gets the bad news about her mother's

stroke by phone, to the last page, the author's personality shines through. Her outrage, quiet humor, and sense of decency make this book stand out in ways it never might have if a lesser writer had created it. Ms. Bosworth's mother had a stroke. That much can be gleaned from the title. From there the author takes each reader through a maze of doctors, nurses, and therapists who are less than helpful. Some are downright rude, or maybe ignorant. Her search for answers, and for professionals who have hearts as well as brains is

detailed honestly. With the support of a loving, close-knit family, she struggles to find a constructive way of managing her mother's care. Kathleen Bosworth educates herself about treatment plans, possible outcomes, patients rights, living wills, and insurance coverage. With courage and determination, she and her brother fight the system to get their mother the loving care she needs and deserves. I recommend this book to everyone and repeat again: This is a stunning story.
